

Academic Year: (2017 / 2018)

Review date: 20-04-2017

Department assigned to the subject: Library and Information Sciences Department

Coordinating teacher: CALZADA PRADO, FCO JAVIER

Type: Basic Core ECTS Credits : 3.0

Year : 1 Semester : 2

Branch of knowledge: Social Sciences and Law

OBJECTIVES

At the completion of this course, students will

1. Understand the importance of resource-based learning and research.
2. Recognize information problems and develop effective strategies to solve them.
3. Become familiar with general and specialized information sources, and be able to determine their appropriateness for the task at hand.
4. Determine the reliability and quality of information and its sources.
5. Develop their information retrieval skills, improving the precision and efficiency of their searches.
6. Use information ethically, avoiding plagiarism, and following academic conventions and professional requirements.

DESCRIPTION OF CONTENTS: PROGRAMME

UNIT 1: WHERE TO FIND RELIABLE INFORMATION

- Data, information and knowledge.
- Competences in information.
- Sources of information: typology and location.
- Evaluation of information resources.

UNIT 2: ETHICAL USE OF INFORMATION: CITATION AND REFERENCES

- Ethics and intellectual property.
- The academic work without plagiarism.
- Create and manage in text citations and bibliographic references.
- Present and organize references.
- Software products for generating and managing citations and bibliographies.

UNIT 3. INFORMATION RETRIEVAL: GENERAL RESOURCES

- Basic concepts of Information Retrieval.
- Information search processes in electronic environments.
- Multidisciplinary databases.
- Internet search tools.

UNIT 4. INFORMATION RETRIEVAL: THEMATIC AND SPECIALIZED RESOURCES

- Portals and specialized databases.
- Selection of online resources.
- New spaces of knowledge interaction.

LEARNING ACTIVITIES AND METHODOLOGY

Acquisition of theoretical knowledge (1 ECTS), through lectures, teaching materials prepared by the teacher, online tutorials, specialized reading, and the students' personal study, related to theoretical competences.

Acquisition of practical skills and abilities (2 ECTS), through case-studies oriented to information seeking in web sources, analysis of these sources, evaluation of results, presentation and citation of content.

Student assignments will be done partly in a computers classroom with direct supervision of the teacher; and partly out of the classroom with the support and subsequent control of the teacher. These assignments will be in particular oriented on the acquisition and development of practical skills.

ASSESSMENT SYSTEM

The course uses continuous assessment as the basis for determining the level of student performance, as well as class-based tests, according to the following parameters:

- Formative continuous assessment based on practical assignments, class-based tests and a group project: up to 60% of the final grade.
- Final theory and practice tests held on the last day of regular classes, during usual hours: up to 40% of the final grade.

Students not passing this subject will have an additional opportunity to make up for it provided they have participated in at least 30% of its learning and continuous assessment activities. To benefit from this opportunity, students must complete the following activities:

- Multiple choice test where the acquisition of specific knowledge of the subject (50% of grade) will be verified. This test will take place the day before the start of the extraordinary call. The teacher notify students classroom and time reserved for its realization. If the student satisfactorily completes the supplementary assessment, the record would be updated accordingly.
- Work proposed by the teacher (50% of grade). The deadline for delivery of the work is the day set for the test.

IMPORTANT NOTICE: As in all your work, no copying or plagiarism is allowed. If such is detected, no credit for the activity will be given.

% end-of-term-examination:	0
% of continuous assessment (assignments, laboratory, practicals...):	100
