STUDENTS ARE EXPECTED TO HAVE COMPLETED
Marketing
Statistics I
Statistics II

COMPETENCES AND SKILLS THAT WILL BE ACQUIRED AND LEARNING RESULTS.

Learning objectives:
- To become skilled at basic concepts and methodologies needed to perform a marketing research study (problem proposition, sampling, collecting and analysing data, reporting findings);
- To comprehend firms’ problems in order to design proper marketing research studies;
- To apply marketing research processes to real market situations, which are relevant to the firm;
- To analyze outcomes of marketing research studies in order to suggest the most appropriate strategic orientation and operational actions.

Skills objectives:
- To become familiar with a wide range of marketing research methodologies;
- To prepare reports and communicate results to an audience of company executives;
- To make use of one of the mostly diffused software’s programs for marketing research;
- To participate in working groups, whose aim is to stimulate creativity and accuracy.

Attitudinal objectives:
- Curiosity towards marketing and its challenges;
- Criticism and creativity to solve managerial problems;
- Interest in applying a portfolio of diversified tools needed to draw reliable conclusions;
- Ethics, according to the international code and guidelines on market and social research defined by ICC/ESOMAR.

DESCRIPTION OF CONTENTS: PROGRAMME

Topic 1. Introduction to Marketing Research
1.1. The process of Marketing Research
1.2. Classification of Marketing Research Studies
1.3. Problem definition
1.4. Preparing a marketing research report

Topic 2. Exploratory, descriptive and causal research techniques
2.1. Exploratory designs: In-depth interviews, Focus groups and observation
2.2. Descriptive designs: Surveys and panels
2.3. Explicative designs: Experiments and conjoint analysis techniques

Topic 3. Fieldwork and data preparation
3.1. The nature of fieldwork
3.2. Data coding
3.3. Computerized databases

Topic 4. Univariate hypotheses testing
4.1. Frequency
4.2. Tendency
4.3. Dispersion

Topic 5. Bivariate hypotheses testing
5.1. Testing for significant differences
5.2. Testing for association

Topic 6. Multivariate preferences analysis with SPSS
6.1. Multiple regression analysis
6.2. Analysis of variance and covariance (ANOVA, MANOVA, etc.)
LEARNING ACTIVITIES AND METHODOLOGY
During the course, students will participate in both theory lectures and practice sessions (based on case study discussions, problem sets solving and use of software packages at computer lab), whose aim is that of transferring conceptual and methodological knowledge.
In order to improve their personal capabilities, students will individual assignments and participate in a teamwork experience in which all steps of a marketing research study are performed.

ASSESSMENT SYSTEM
The assessment system of this course is based on two main components: 1) an individual, written exam; and, 2) a practical activities.
The final exam accounts for 50% of the course grade. Its objective is to assess whether and how much each student knows, understands and is able to put in practice the concepts and methodologies of marketing research.
The practical activity accounts for the remaining 50% of the course grade. Students are expected to perform courseworks and participate in class. In particular, it will be considered individual courseworks, group coursework and class participation. The attendance to the reduced group is required for the group coursework.

In order to pass the subject, it is compulsory a minimum grade in the final exam of 3.5. Otherwise the assignments graded during the course will not be considered.

% end-of-term-examination: 50
% of continuous assessment (assignments, laboratory, practicals...): 50
