ASSESSMENT SYSTEM

The final grade will be the weighted sum of two partial exams (each counting 25%) and a final exam (worth 50%).

In order to compute the weighted average of all marks, the student must obtain at least 4 points in the final exam. Otherwise, the student will not pass the course.

If the percentage of students with an overall grade of Sobresaliente is less than 10 percent of the students who have taken the final exam in the Degree, the top students with a Notable grade will be

given a grade of 9 until the 10-percent level is reached. After this correction is made, if the number of students with a Notable grade is below 10 percent, an analogous correction will be made, raising the grades of the top students with an Aprobado grade to 7. An analogous correction will be applied, if needed, to ensure that at least 15 percent of students have an Aprobado grade.

% end-of-term-examination:	50
% of continuous assessment (assignments, laboratory, practicals...):	50
