

Academic Year: (2019 / 2020)

Review date: 13/05/2016 18:30:34

Department assigned to the subject: Economics Department

Coordinating teacher: YURDAGUL , EMIRCAN

Type: Compulsory ECTS Credits : 3.0

Year : 1 Semester : 1

OBJECTIVES

- Acquire skills which can be used to develop new ideas, in a research context.
- Students will be able to apply the ideas of the course to understand and interpret both real world situations and more research oriented issues.
- Students will be able to acquire a framework to communicate in a formal way their arguments to both a general audience and to a more specialized audience.
- Students will learn the basics to be able to continue studying beyond the material of the course in an independent way.
- Interpret economic data.
- Apply economic analysis.
- Explain complex economic arguments both orally and written.
- Acquire enough skills to keep on studying in an independent way.
- Know basic principles of economic analysis.
- Understand both classical and new models of international trade.
- Study economic policies and their macroeconomic consequences.
- Study international macroeconomics.
- Study financial crisis and their consequences.
- Understand the origin and effects of bubbles.

DESCRIPTION OF CONTENTS: PROGRAMME

- Classical trade models
