
Academic Year: (2019 / 2020)

Review date: 19-09-2016

Department assigned to the subject: Department of Systems Engineering and Automation

Coordinating teacher: SALICHS SANCHEZ-CABALLERO, MIGUEL

Type: Compulsory ECTS Credits : 6.0

Year : 1 Semester : 1

COMPETENCES AND SKILLS THAT WILL BE ACQUIRED AND LEARNING RESULTS.

- Knowledge of the state of the art of intelligent autonomous robotics
- Knowledge of the bases of intelligent autonomous robotics

DESCRIPTION OF CONTENTS: PROGRAMME

Introduction to robotics
Autonomy
Intelligence
Control architectures of robots
Introduction to robot learning
Introduction to robot perception
Introduction to decision making
Introduction to human-robot interaction
Roboethics

LEARNING ACTIVITIES AND METHODOLOGY

Theoretical and experimental lectures, presentations of the students, individual tutorials and personal work of the student. The participation of the students will be promoted in all lectures.

ASSESSMENT SYSTEM

Final exam, individual work and participation in lectures

% end-of-term-examination: 50

% of continuous assessment (assignments, laboratory, practicals...): 50
