Year : Semester :

## OBJECTIVES

Knowledge of the main elements of International relations and international society. Knowledge of the role of International organisations in International society. There is an analysis of the transformations, features, subjects and actors of the International society. The central element of analysis is the role that International organisations play in international relations. We make a deep examination on the role, characters and elements of International organisations. We seek to understand fully the phenomenon of International organisations, in a general perspective

### Learning results

- Know the main international organizations, the objectives and aims
- Know the role of international cooperation within the framework of organizations on a cultural, economic and environmental level
- Identify which are the traits, functions and characteristics of the most important international organizations
- Be able to understand the different decision making procedures in international organizations
- Be able to analyse the main international organizations on an organizational and institutional level and their functioning both within the universal United Nations system as well as on a regional American, African and Asian level

## LEARNING ACTIVITIES AND METHODOLOGY

The techniques used will be the best adapted, taking into account the Schedule. In the theoretical class we use the traditional methodology consisting of an oral exposure of knowledge. Classes in relation to the other techniques will follow their own methodologies. Teachers will follow the Schedule. They can adapt to changes in the course. In short, students must submit case Studies, class Works and other types of elements as self control, written essays, participation in collective activities and assistance to Schedule activities.

## ASSESSMENT SYSTEM

-The final exam is a theoretical test. The student must choose three questions of four selected by professor, between the sections of the official program. The rating of this is the 40% of the final grade of the subject. The student must obtain 4/10 for approval

-The continuous assessment will have the value of 60%, to be divided:

-Written and class presentation of a work, according to the professor's guidelines (30%)

-Other activities established by professor (class presentation, recommended readings, cases, workshops, proceedings...): 30%

**% end-of-term-examination:** 40

**% of continuous assessment (assignments, laboratory, practicals...):** 60
