- Develop reports, opinions, formalities and administrative claims or lawsuits to develop professional activity in law firms, companies or bodies, public or private in the field of data protection, telecommunications

DESCRIPTION OF CONTENTS: PROGRAMME

- Practices will be carried out within the working day established by the institution of practices that welcomes the student and must always be compatible with the schedule of the Master's classes. The student must comply with all the requirements indicated by the person who manages the practices.

-Once awarded the performance of the practice, the admitted student must be presented at the corresponding institution and comply with the indications that they determine. The internships are not remunerated, they are part of the master's program that the student must pass.

- Once incorporated, the student must complete 180 hours of practice - at least - subject to the duration, schedule, time, place, activity and other conditions established in the corresponding agreement signed between the University and the institution of practices where they are carried out the same.

LEARNING ACTIVITIES AND METHODOLOGY

Formative activity:

The purpose of the subject "Practices" is to offer students an approach to the world of work through the completion of external internships. Specifically, it is intended that they know the activity developed in the different companies and public or private institutions where the students will carry out the practices. The student will practice directly with the knowledge obtained in the Master, familiarizing himself with activities of the professional practice as support in the search of documentation, discussion of cases, preparation of strategies, writing of documents, consultations, report and any other that the institution consider relevant

The methodology that will be followed in this subject will be the following:

Resolution of practical cases, problems, assumptions, preparation of strategies, preparation of works or reports or any other activity that poses the person responsible for practices individually or in groups. T

Discussion with designated tutor on problems, orientation and resolution of professional problems

Tutorial

The student can access tutorials both from the person who coordinates the internship, as well as from the person in charge of the management of internships and the person in charge of the company to take their tutoring.

ASSESSMENT SYSTEM

Evaluation of academic performance.

In the determination of this final note will be assessed:

- o Activity report (10% of the grade). elaborated by the student.
- o Report of the external tutor (in the company) (80% of the grade)
- o Compliance with the SOPP service (such as providing data to the SOPP, compliance with deadlines, discipline, attendance at the praces, responses to emails, etc.) (10% of the grade)

The lack of unjustified delivery of the report of activities within 15 days after the end of the internship period, will penalize the grade depending on the degree of delay. If they do not appear or the delay exceeds one month, the subject is automatically qualified as "Not Submitted".

All students in this subject are required to attend all of the 180 scheduled hours. They can only be absent, if the institution allows it, without justified reason, to a maximum of 15 percent of the contact hours established (not of the sessions, nor the days) and provided that the institution subsequently allows the student to comply with the completion from 180 hs. obligativas.El unjustified absence to the practices will determine the SUSPENSE of the same.
