Introduction to Business Economics

COMPETENCES AND SKILLS THAT WILL BE ACQUIRED AND LEARNING RESULTS.

The course aims to provide you with specific tools that will enable you to:

- ¿ Understanding how firms gain and sustain competitive advantage;
- ¿ Analyzing strategic business situations and formulating strategy; and
- ¿ Implementing strategy and organizing the firm for strategic success.

Success depends not only on the soundness of the formulated strategy, but also on effective implementation through appropriate organizational choices. This course focuses on strategic decisions, and with both the content of those decisions and the processes by which general managers position the businesses and allocate resources under conditions of uncertainty and competition. This course utilizes various tools, concepts, and analytical frameworks that enhance our ability to define and analyze strategic problems and to identify sources of competitive advantage from both an industry and firm level perspective.

To accomplish our objectives, we will use a variety of learning techniques: lectures, outside of class assignments, readings, written reports, presentations, and most importantly, class discussion of case studies.

LEARNING ACTIVITIES AND METHODOLOGY

Case Analysis

Strategic thinking and analysis are best learned through practice. The capstone business cases we will study concern real-world business situations. These cases are designed to provide you with data on real-life managerial problems, and case analysis is useful as a simulation of actual managerial activity. These integrative cases provide an opportunity to both apply the concepts that we discuss in class as well as to further develop our ability to think about business strategy. How much you learn from these strategic management cases depend on your preparation and active participation. Everyone is expected to participate effectively in each class to comment, question, and analyze.

Group Work

Discussing cases and preparing analyses outside of class helps to deepen your knowledge about strategic management. Group work will be essential for the major group project.

Exam

There will be an in-class (closed-book) final exam. This exam will test both your mastery of the concepts and your ability to apply them.

Individual Participation

Active participation in the class is an essential part of the learning experience. You are expected to contribute both to the case discussion and to discussion during the lecture sessions.

ASSESSMENT SYSTEM

55% Final Exam

25 % Course Project

20 % Class Participation and Assignments

% end-of-term-examination: 55

% of continuous assessment (assignments, laboratory, practicals...): 45
