Accounting for Management

Academic Year: (2019 / 2020)   Review date: 28-09-2018

Department assigned to the subject: Business Administration Department

Coordinating teacher: CHO , HYUNGJIN

Type: Compulsory ECTS Credits : 3.0

Year : 1 Semester : 1

OBJECTIVES

The course introduces students to how firms prepare their financial statements (their accounting information) and to the tools needed to analyze and understand this information. By using these financial tools, analysts and other agents interested in the firm are able to assess and evaluate the past performance of a company, compare the firm performance across time, and compare it to its peers.
The main objective of this part of the course is that students are able to:

- Understand the content of financial statements
- Understand firms accounting choices (and don´t be fooled by them)

Overall, students are expected to become sophisticated users of accounting and financial information interactions between corporate financial decisions and the other managerial decisions.
