Microeconomics III

Academic Year: (2019 / 2020) Review date: 20-05-2019

Department assigned to the subject: Economics Department Coordinating teacher: SCHNEIDER , JOHANNES SIEGFRIED

Type: Compulsory ECTS Credits: 9.0

Year: 2 Semester: 1

REQUIREMENTS (SUBJECTS THAT ARE ASSUMED TO BE KNOWN)

Microeconomics I and Microeconomics II

OBJECTIVES

- -Build and analyze models with asymmetric or incomplete information.
- -Familiarize with the classic applications of these models to real life economic problems.
- -Grasp the magnitude of the problems in real economies due to asymmetric or incomplete information.
- -Develop the skills to use the analytical tools of the models of asymmetric or incomplete information: adverse selection, moral hazard, screening, signaling, mechanisms, contracts.

DESCRIPTION OF CONTENTS: PROGRAMME

Introduction to topics and tools of modern theory of information.

- 1. Games with Incomplete Information: elements of a game of incomplete and/or asymmetric information, Bayes-Nash equilibrium, perfect equilibrium.
- 2. Adverse selection and moral hazard: unobservable characteristics (screening and signalling); unobservable actions: ex ante, interim and ex post efficiency.
- 3. Introduction to contract theory: menus of contracts, guaranties, bilateral contracts: insurance, credit, labor.
- 4. Introduction to mechanism design: Bayesian implementation with transferable utility, applications: monopoly, auctions, public goods, bilateral trade. Dominant and ex post implementation with transferable utility

ASSESSMENT SYSTEM

The final grade is computed as a weighted average: 40% the grade in the continuous evaluation and 60% the grade of the final exam. The grade in the continuous evaluation is computed based on the solutions to the problem sets and the midterm.

% end-of-term-examination: 60 % of continuous assessment (assignments, laboratory, practicals...): 40
