

## Chemical basis of engineering

Academic Year: ( 2019 / 2020 )

Review date: 28-04-2020

Department assigned to the subject: Department of Materials Science and Engineering and Chemical Engineering

Coordinating teacher: GONZALEZ BENITO, FRANCISCO JAVIER

Type: Basic Core ECTS Credits : 6.0

Year : 1 Semester : 2

Branch of knowledge: Engineering and Architecture

## COMPETENCES AND SKILLS THAT WILL BE ACQUIRED AND LEARNING RESULTS.

By the end of this content area, students will be able to have:

1. Knowledge and understanding of the chemical basis, organic and inorganic applied chemistry underlying the branch of industrial engineering;
2. The ability to apply their knowledge and understanding to identify, formulate and solve problems of chemical basis, organic and inorganic applied chemistry using established methods;
3. The ability to design and conduct appropriate experiments of chemistry, interpret the data and draw conclusions;
4. Workshop and laboratory skills in chemistry.
5. The ability to select and use appropriate equipment, tools and methods to solve problems of chemical basis, organic and inorganic applied chemistry;
6. The ability to combine theory and practice to solve of chemical basis, organic and inorganic applied chemistry.
7. The ability to function effectively both individually and as a team.

## DESCRIPTION OF CONTENTS: PROGRAMME

IMPORTANT: the schedule will be adjusted according to the recently approved School Board April / May 2013

Atoms, Molecules and Ions. Chemical bonding.  
 Thermochemistry and chemical equilibrium.  
 Chemical Equilibrium: Acid-Base and solubility equilibria. Electrochemistry.  
 Chemical Kinetics  
 Applied Organic and Inorganic Chemistry  
 Basic operations in Chemical Engineering

## LEARNING ACTIVITIES AND METHODOLOGY

Theoretic lessons  
 Lesson dedicated to solving problems and exercises  
 Individual and collective tutorial sessions.  
 Material with solved and unsolved problems (but with solutions) with the aim of directing the personal work of the student.  
 Laboratory practical sessions

- Before accessing the laboratories, all students should watch some videos on safety in chemistry laboratories and, after that, they have to pass some virtual questionnaires (Aula Global) in order to demonstrate the contents of the videos are understood.

## ASSESSMENT SYSTEM

Continuous evaluation (40 %):  
 - Tests performed in class (30%)  
 - Attendance to practical sessions and assessed practical work paper (10%),

Final exam (60%).  
 Laboratory practices are mandatory for being assessed.  
 For being averaged with the continuous assessment, marks higher than 4.0 must be obtained in the final exam.

**% end-of-term-examination:** 60

**% of continuous assessment (assignments, laboratory, practicals...):** 40
