LEARNING ACTIVITIES AND METHODOLOGY

ECTS credits are divided into two blocks: (1) theoretical and (2) practical.

1. The theoretical contents will be supported by online master classes to Blackboard Collaborate supported on the UC3M Virtual Classroom platform. , using the most pedagogically appropriate methodology in each exhibition. The students will have before the class the diagrams of each of the

topics that are projected in each Blackboard Collaborate class to which other materials (links to articles, videos, songs, campaigns, etc.) are added for better learning at a distance and reinforce their self-learning. the classroom and other materials (links to articles, videos, songs, campaigns, etc.).

2. The practical exercises are of two types:

The practical exercises are of two types:

1.- The practices of the topics will be done with some of the basic readings of the bibliography, press articles, normative texts, documentaries or films, source searches and labor statistics management. Practices will be mostly group from two people to groups of four people. The practices add knowledge to the theory presented online, but they must also reinforce what has been learned in it and, above all, allow creating group cohesion that makes it easier to follow the course. At least 8 practices will be carried out in addition to the equality policy.

2.- The second type will consist of the elaboration of a public policy of equality. This work will be carried out throughout the four-month period. Once the groups have been constituted and the object and objective chosen, the different sections will be delivered to be reviewed and improved in those cases where necessary. This practice will be delivered at the end of the course.

ASSESSMENT SYSTEM

The final grade for the course consists of four parts:

- Continuous evaluation of all the practices carried out throughout the course 50%.
- Design of public policy 25%
- Exam: 15%
- Follow-up of the subject in the confinement: 10%

It is essential to do at least 80% of the practices so that they are evaluable within continuous training. To pass the subject, you must pass the final exam.

% end-of-term-examination:	15
% of continuous assessment (assignments, laboratory, practicals...):	85
