LEARNING ACTIVITIES AND METHODOLOGY

TEACHING METHODS

Exhibitions in class with teacher support and audiovisual media, in which the main concepts of matter are developed and the literature is provided to supplement student learning .

Critical reading recommended by the teacher of the subject texts:

Newspaper articles, reports, manuals and / or academics, good items for further discussion in class , either to expand and consolidate the knowledge of the subject.

Resolution of practical cases , problems , etc. , set by the teacher individually or in group

Presentation and discussion in class under teacher moderation issues related to the subject content and practical case

Preparation of papers and reports individually or in group

ASSESSMENT SYSTEM

% end-of-term-examination/test:	60
% of continuous assessment (assignments, laboratory, practicals...):	40

According to the practical nature of the training and methodological activities give teachers special weight to continuous assessment. It will be held from the participation of students in class and performing midterms and / or resolution of practical cases (60 % of score) .

The final exam will consist of a test type , no less than 20 questions , or a case study on specific issues (comment of any specific rules or with a judgment of TJ) and will represent the remaining 40 % of the grade .

This is without prejudice to the regulations in force at all times.

As for the resit it will be able to recover 100 100 qualification by performing a test (20 questions) and the resolution of a case or the comment of a judgment of TJ .

The absence of more than 20% of the front classes causes dismissal from the course.
