

Academic Year: ( 2020 / 2021 )

Review date: 03-10-2020

Department assigned to the subject: Mathematics Department

Coordinating teacher: ALVAREZ ROMAN, JUAN DIEGO

Type: Basic Core ECTS Credits : 6.0

Year : 1 Semester : 1

Branch of knowledge: Engineering and Architecture

## OBJECTIVES

By the end of this content area, students will be able to have:

1. Knowledge and understanding of the mathematical principles underlying their branch of engineering.
2. The ability to apply their knowledge and understanding to identify, formulate and solve mathematical problems using established methods.
3. The ability to select and use appropriate tools and methods to solve mathematical problems.
4. The ability to combine theory and practice to solve mathematical problems.
5. The ability to understanding of mathematical methods and procedures, their area of application and their limitations.

## DESCRIPTION OF CONTENTS: PROGRAMME

1. Real variable functions.
  - 1.1 The real line.
  - 1.2 Elementary functions.
2. Sequences and series
  - 3.1 Sequences of real numbers.
  - 3.2 Series of real numbers.
3. Differential calculus in one variable.
  - 3.1 Limits of functions.
  - 3.2 Continuity.
  - 3.3 Derivability.
  - 3.4 Extrema of functions.
  - 3.5 Rolle's and Mean Value theorems.
  - 3.6 Graphic representation.
  - 3.7 Taylor's polynomial.
  - 3.8 Taylor's series.
4. Integration in one variable.
  - 4.1 Integrable functions, properties of the integral and calculus of primitives.
  - 4.2 The Fundamental Theorem of Calculus.
  - 4.3 Improper integrals.
  - 4.4 Applications: areas, lengths and volumes by sections.

## LEARNING ACTIVITIES AND METHODOLOGY

The docent methodology will include:

- Master classes,
- Practical classes
- Selfevaluations.
- Partial controls.
- Tutorials.
- Final examination.

<b>% end-of-term-examination:</b>	40
<b>% of continuous assessment (assignments, laboratory, practicals...):</b>	60
