Knowledge:

- Know and understand the objectives and strategies of the Operations Management.
- Know and understand the main concepts and models associated with quality.
- Know and understand the foundation of the design and development processes of goods and services.
- Know and understand the processes of generation of goods and services and the corresponding distribution in plant of the facilities.
- Know and understand decisions about location and capacity.
- Know the planning of the necessary resources in the generation of goods and services.
- Apply all the previous points to problem solving.

Abilities:

- Ability to make decisions.
- Ability to work individually, prioritizing the accuracy and precision of the results.
- Capacity for teamwork.
- Ability to relate to others.
- Ability to adapt to new situations.
- Ability to accept other points of view.

Attitudes:

- Ability to search and curiosity.
- Have an enthusiastic attitude to solve problems.
- Defend and justify certain actions.

DESCRIPTION OF CONTENTS: PROGRAMME

1. Operations Management in context
2. Managing Operations Strategically
3. Project Management
5. Designing Business Processes and Capacity (chapters 7 and 7S)
- 6.-Total Quality management (chapter 6)
7. Capacity Design and lay-Out Planning (chapters 8 and 9)
8. Designing Products and Services, sustainable Operations Management (chapters 5 and 5S)
9. Circular Economy

LEARNING ACTIVITIES AND METHODOLOGY

Students will acquire the knowledge and skills through lectures, the handing of the work assigned by the teachers and its discussion in class. Skills and attitudes will be enhanced by the individual and teamwork performed by the students and their discussion in class. The lectures moreover will also try to open up the discussion to the students via the collective analysis of tables, graphs or texts and the use of questions and multiple choice tests on the main concepts discussed in the lecture. (AF1,AF2, AF3, MD1, MD2, MD3)

as the blended learning approach is being used more and more extensively, we will reinforce class recordings, greater use of forums, chats, tutoring, exhibitions in virtual classrooms, work, and like

ASSESSMENT SYSTEM

To evaluate the knowledge, skills and abilities achieved by students of the course, we will use a continuous evaluation mechanism and a final exam.

In the continuous assessment mode, two types of tests are developed:

- a.- 2 multiple-choice tests with practical content, each with a maximum score of 15% of the total grade for the subject (maximum total score: 30%)
- b.- 2 deliveries of team work, with theoretical/practical content, with a maximum score of 30% of the total grade for the subject each (maximum total score: 60%)
- c.- Individual global learning is assessed with a multiple choice theory exam that covers the entire content of the subject (10%)

Final Note =

= (Average marks of continuous evaluations of Practice x 0.3) + (Average marks of continuous evaluations of team Work x 0.6) + (final exam mark x 0.1)

Regarding the final and extraordinary exams, their content will be the agenda seen during the course and they will consist of Theory and Practice. The weight of each of them in the composition of the final grade is as follows:

THEORY 50% and PRACTICE 50%.

% end-of-term-examination:	10
% of continuous assessment (assignments, laboratory, practicals...):	90
