

Academic Year: (2021 / 2022)

Review date: 29-06-2021

Department assigned to the subject: Pascual Madoz Institute of Land, Urbanism and Environment

Coordinating teacher: VIDA FERNANDEZ, JOSE

Type: Compulsory ECTS Credits : 3.0

Year : 1 Semester : 2

LEARNING ACTIVITIES AND METHODOLOGY

SISTEMA DE EVALUACIÓN

La evaluación tiene como misión conocer el grado de cumplimiento de los objetivos programados. En este sentido, es preciso indicar que el Máster en Derecho de las Telecomunicaciones, Protección de Datos, Audiovisual y Sociedad de la Información es un programa que se imparte con carácter presencial, pues se considera fundamental la asistencia del estudiante para acceder y comprender los conocimientos y experiencias transmitidos por los distintos profesores que participan en el máster que cuentan con una trayectoria profesional y académica importante en la materia desarrollada.

A partir de esta consideración, es preciso destacar que la calificación final de las/los estudiantes que persigue valorar los conocimientos adquiridos a través del sistema de evaluación de la asignatura que combina las siguientes actividades y porcentajes:

(i) Examen Final (50%). Se realizará una prueba tipo test de conocimientos, de carácter individual, relativo a los principales conceptos desarrollados durante las sesiones, con preguntas elaboradas por los distintos profesores que han impartido las sesiones.

(ii) Realización de actividades o trabajos, individuales durante el desarrollo de la asignatura (50%): Se ponderarán diversas actividades como la resolución de casos prácticos; búsqueda de distinta documentación señalada con antelación y trabajada; exposición y defensa de los materiales trabajados; lectura de bibliografía y resumen de su exposición.

Las/los estudiantes están obligados a asistir a la totalidad de las clases teóricas y prácticas que se hayan programado. Solamente podrán ausentarse, sin motivo justificado, a un máximo del 15 por ciento de las horas presenciales de clase (no de las sesiones ni los días) en cada asignatura. En caso de ausencias justificadas, el máximo total será del 25 por ciento. Si el estudiante incurriera en una falta de asistencia superior a las indicadas, se le calificará con un "0" en la evaluación continua. Igualmente, las ausencias inferiores a dichos porcentajes podrán ser tenidas en cuenta a la hora de modular a la baja la calificación de la evaluación continua, especialmente si incluye una nota de participación

Las actividades no realizadas durante la evaluación continua se calificarán con un 0. La calificación final que se obtenga podrá ser ajustada por el profesor (hasta el máximo de un punto) en función de la participación y las intervenciones en clase.

Cada profesor podrá exigir en su grupo una nota mínima en el examen final para realizar la evaluación global, siempre que lo indique expresamente al principio del cuatrimestre, a través de Aula Global o cualquier otro medio.

Evaluación en la convocatoria extraordinaria, si el estudiante siguió evaluación continua tendrá derecho a que se le tenga en cuenta la calificación de la misma (siempre que le beneficie), y si no la siguió tendrá derecho a realizar un examen final con valor del 70 % de la calificación total de la asignatura.

Los alumnos que no realicen el examen final, sea en la convocatoria ordinaria o extraordinaria, figurarán como no presentados.

En caso de que se adopten medidas extraordinarias que exijan una docencia a distancia, el sistema de evaluación se mantendrá en los mismos términos, si bien el profesor podrá adaptar las actividades de la evaluación continua inicialmente programadas. En dicha situación el profesor determinará las condiciones de realización del examen final a distancia que, en la medida de lo posible, seguirá siendo el mismo inicialmente previsto.

The mission of the evaluation is to know the degree of fulfillment of the programmed objectives. In this sense, it is necessary to indicate that the Master in Telecommunications Law, Data Protection, Audiovisual and the Information Society is a program that is taught in person, since the attendance of the student is considered essential to access and understand the knowledge and experiences transmitted by the different professors participating in the master who have an important professional and academic career in the subject developed.

From this consideration, it is necessary to highlight that the final grade of the students that seeks to value the knowledge acquired through the subject evaluation system that combines the following activities and percentages:

(i) Final Exam (50%). There will be an individual knowledge test, related to the main concepts developed during the sessions, with questions developed by the different teachers who have taught the sessions.

(ii) Carrying out individual activities or work during the course (50%): Various activities will be weighted, such as solving practical cases; search for different documentation indicated in advance and worked on; exposition and defense of the worked materials; reading of bibliography and summary of his exposition.

Students are required to attend all the theoretical and practical classes that have been scheduled. Only a maximum of 15 percent of the classroom hours (not of the sessions or days) in each subject may be absent without just cause. In case of excused absences, the total maximum will be 25 percent. If the student incurred a lack of attendance higher than those indicated, they will be scored with a "0" in the continuous evaluation. Likewise, absences below these percentages may be taken into account when modulating the continuous assessment grade downwards, especially if it includes a participation note.

Activities not carried out during the continuous evaluation will be rated with a 0. The final grade obtained may be adjusted by the teacher (up to a maximum of one point) depending on participation and class interventions.

Each teacher may require a minimum grade in the final exam in their group to carry out the global evaluation, provided that it is expressly indicated at the beginning of the term, through Aula Global or any other means.

The evaluation in the extraordinary call, if the student followed continuous evaluation, he will have the right to be taken into account the grade of the same (whenever it benefits him), and if he did not follow it, he will have the right to take a final exam with a value of 70 % of the total grade of the subject.

Students who do not take the final exam, either in the ordinary or extraordinary call, will appear as not presented.

In the event that extraordinary measures are adopted that require distance teaching, the evaluation system will be maintained in the same terms, although the teacher may adapt the activities of the continuous evaluation initially scheduled. In this situation, the teacher will determine the conditions for taking the final exam at a distance, which, as far as possible, will remain the same as originally planned.
