

Master's Thesis

Academic Year: (2021 / 2022)

Review date: 23-04-2019

Department assigned to the subject: Department of Computer Science and Engineering

Coordinating teacher: REVIRIEGO VASALLO, PEDRO

Type: Master Final Project ECTS Credits : 12.0

Year : 1 Semester : 0

REQUIREMENTS (SUBJECTS THAT ARE ASSUMED TO BE KNOWN)

36 ECTS of compulsory subjects (including both seminars) and 12 ECTS of elective subjects.

OBJECTIVES

Capability of developing and applying original ideas often in a research context. (CB6)

Capability of applying the knowledge acquired from the different subjects of the Master to solve problems in new environments or less familiar for the student taking into account a bigger (even multidisciplinary) context. (CB7)

Capability to relate and integrate knowledge and facing the complexity of making judgements from incomplete or partial information, including student's personal reasoning judgement and knowledge. This includes taking into account legal and ethical questions about the consequences of executing a given procedure given a particular context. (CB8)

Capability of concisely communicating the student's personal conclusions, including the knowledge and reasons those conclusions are based on, to an specialized or non specialized audience. (CB9)

Learning abilities to allow further study and follow technology evolution. (CB10)

Besides, the student will also acquire the specific competences related to the chosen field of the Master Thesis, and will enforce the related general competences.

DESCRIPTION OF CONTENTS: PROGRAMME

The Master Thesis, hereinafter TFM, is the development, delivery and public defense of an original work related to some Cybersecurity area.

The supervisor of the TFM will be a teacher of the Master Program or a teacher of one of the three involved departments.

The work documentation will follow the working rules of technical articles. The student will elaborate and submit a document detailing the work done. This document will include the review of the related state of the art, the followed methodology, the used tools, the detailed description of the proposal or solution, and the time scheduling and cost expenses.

LEARNING ACTIVITIES AND METHODOLOGY

The TFM is an autonomous activity realized under supervision, and consistent with the identified problem: context and present knowledge of the problem, evolution proposals, work methodologies proposed, learning the applicable tools for the solution, etc.

The supervisor will schedule the tutoring hours.

Specific rules from the UC3M:

http://www.uc3m.es/ss/Satellite?blobcol=urldata&blobheader=application%2Fpdf&blobheadername1=Content-Disposition&blobheadername2=Cache-Control&blobheadervalue1=attachment%3B+filename%3D%22NORMA_TFM_CIBERSEGURIDAD.pdf%22&blobheadervalue2=private&blobkey=id&blobtable=MungoBlobs&blobwhere=1371547511290&ssbinary=true

ASSESSMENT SYSTEM

The assessment on the TFM will be performed by a three members court, from at least two of the three departments involved in the Master Program. If the supervisor of one TFM is in the court, she/he will be replaced by a reserve, so that the supervisor judgement is not one of the three judgements of the court.

Upon finalizing the public defense of candidates, the court will orally communicate the assessment to the students. Besides the official assessment report will indicate if the TFM document and defense where both in english.

Students may ask for a review of the assessment. Such review will be performed according to the University Official rules for Master Thesis

(http://www.uc3m.es/ss/Satellite/UC3MInstitucional/es/ListadoNormativas/1371206706673/Estudios_de_Postgrado)

The University uses the Turnitin Feedback Studio program within the Aula Global for the delivery of student work. This program compares the originality of the work delivered by each student with millions of electronic resources and detects those parts of the text that are copied and pasted. If the student has correctly made the appointment and the bibliographic reference of the documents he uses as a source, Turnitin will not mark it as plagiarism.
