 Topic 8: Penalty and criminal law and information technologies

LEARNING ACTIVITIES AND METHODOLOGY

The continuous assessment system is based on a practice-oriented teaching that aims to reinforce the learning of the theory through direct experience in cases that should facilitate the understanding and management of its content.

The academic activities are divided into Master Lessons (large group) and Practice Sessions (small groups).

1. Lectures (Large Groups), in which the general lines of the matter of the corresponding topic will be presented.
2. Practical Sessions (Small Groups), in which specific activities are developed through which a practical vision of the content of the topics will be offered. The activities to be developed will be specified and published in a global classroom at the beginning of the course by each teacher and will always be oriented to practice that aims to reinforce the learning of the theory through direct experience in cases that should facilitate the understanding and management of its content.

B) METHODOLOGY TO BE USED

Lectures in class by the teacher with the support of computer and audiovisual media, in which the main concepts of the subject are developed that will serve as a conceptual and analytical basis in connection with the objectives set and with the documentation provided for the study and the bibliography is

provided to complement student learning.

Critical reading of texts recommended by the professor of the subject: Press articles, reports, manual resolutions and / or academic articles, either for later discussion in class, or to broaden and consolidate the knowledge of the subject.

Presentation and discussion in class, under the moderation of the teacher, of topics related to the content of the subject, as well as proposed practical cases

Group or individual work

. The case studies that arise in the theoretical-practical session may be developed by the students in groups or individually. In general, students must upload the cases worked and analyzed to the Global Classroom within the period indicated by the teacher.

. Students must actively participate in the theoretical-practical sessions proposed by the professor. The tutorials will be held at the time and under the conditions determined by the teacher in Aula Global.

If new extraordinary measures are adopted that require distance teaching, it will continue to be taught under the same conditions initially foreseen (with the same programming, methodology, activities, etc.), although all practical sessions will be taught online .

ASSESSMENT SYSTEM

The global evaluation of the subject will be established by the teacher at the beginning of the semester and will be a continuous evaluation.

The evaluation will be carried out from the weighting of the qualifications obtained in the activities developed throughout the semester and includes a multiple-choice control or questions to be developed at the end of the semester.

The activities not carried out during the continuous evaluation will be scored with a 0.

Students who do not take the final exam, whether in the ordinary or extraordinary session, will appear as not presented.
