LEARNING ACTIVITIES AND METHODOLOGY**FORMATION ACTIVITIES**

Theoretical classes

Practical classes

Tutorials

Team work

Individual student work.

TEACHING METHODOLOGIES:

- Lectures by the teacher with support of computer and audiovisual media, in which the main concepts of the subject are developed and the bibliography is provided to complement the students' learning.

- Critical reading of texts recommended by the teacher of the subject:

Press articles, reports, manuals or academic articles, either for later discussion in class, or to expand and consolidate the knowledge of the subject.

- Resolution of practical cases or problems raised by the teacher individually or in a group:

Exposition and discussion in class, under the moderation of the professor of subjects related to the content of the subject, as well as of practical cases.

- Elaboration of research works individually or in groups.

ASSESSMENT SYSTEM

The continuous evaluation will be carried out as follows:

- Attendance and participation in classes, tasks or practical cases (individual or in group): 50%.
- Final research work (individual or in group): 50%

In any case, the student's ability to handle the documentation, as well as his / her ability to solve and apply correct and effective answers to the situations presented, will be evaluated and that the student has acquired the established competencies.

| | |
|---|-----|
| % end-of-term-examination: | 0 |
| % of continuous assessment (assignments, laboratory, practicals...): | 100 |
