LEARNING ACTIVITIES AND METHODOLOGY

Training activities, methodology to be used and tutoring regime

The continuous assessment system is based on a practice-oriented teaching that aims to reinforce the learning of the theory through direct experience in cases that should facilitate the understanding and management of its content.

The academic activities are divided into Master Lessons (large group) and Practice Sessions (small groups).

1. Lectures (Large Groups), in which the general lines of the matter of the corresponding topic will be presented.

2. Practical Sessions (Small Groups), in which specific activities are developed through which a practical vision of the content of the topics will be offered. The activities to be developed will consist of solving practical exercises, as well as, where appropriate, other control activities such as reading the bibliography or relevant sentences and quizzes or surprise questions to check the level of knowledge on the topics. These activities will be duly announced in Aula Global.

The tutorials will take place at the time and under the conditions determined by the teacher in Aula Global
