

Academic Year: (2022 / 2023)

Review date: 09/10/2019 14:05:51

Department assigned to the subject: Social Sciences Department

Coordinating teacher: TENA JUNGUITO, ANTONIO

Type: Compulsory ECTS Credits : 3.0

Year : 1 Semester : 2

REQUIREMENTS (SUBJECTS THAT ARE ASSUMED TO BE KNOWN)

A graduate course of macroeconomic, international economic theory, and basic tools of statistics and econometrics.

OBJECTIVES

- To develop an analytical critical approach to understand the causes and consequences of long term welfare and inequality changes at a global level.
- To understand the globalization, convergence and divergence phases in the long run.
- To have critical knowledge of globalization and international institutions in the convergence and divergence growth process.
- To understand the dynamic effects of international trade, migrations and capital movements on growth, convergence and inequality in the long run.

DESCRIPTION OF CONTENTS: PROGRAMME

This is a post-graduate course that offers a long-run view on the dynamic effects of international trade and factor movement on growth, convergence and income distribution at a global level. It's required just some basic knowledge of statistics, international and financial economy. We will use and stylize narrative about the international economic history from 1820 to understand today world international economic problems. We will debate, on one hand, trade effects on growth, economic divergence and income distribution, on the other hand, the different alternatives on commercial and monetary models. The historical narrative follows the long 19th century, interwar and the post-war characterized as integration, disintegration and reintegration periods. On this context, it will be studying the interrelation between technology, institutions and geography along the globalization process at the same time that we analyse the convergence and divergence between rich and poor countries and domestic income distribution.

PROGRAM

Topic 1: Introduction: Why are we interested in Globalization, growth and inequality?

- 1.1 Which are the main questions of the course?
- 1.2 It is easy to go out of poverty? Why the West get out of poverty first?

- 8.2 Information Technology and the New Globalization
- 8.3 Globalization and inequality
- 8.3 Globalization, inequality and long term growth.

LEARNING ACTIVITIES AND METHODOLOGY

Acquisition of theoretical, historical and critical skills

- The master lectures will develop some theoretical, historical concepts in critical dialogue framework.

- Reading is important in this course and is below divided by topics. Those readings with an asterisk (*) should be read before the general lecture take place because they are related to the discussion and students will be asked for comments about it. Reading list is long because one of the goals of the course is to develop skills to read in diagonal. To examine introduction and conclusions and makes a rapid wanted of the fundamental arguments, and relevant evidence (table, figures and regressions) to be able to understand and summarize the main points and consistency of the paper. Read something about each topic and most about the topic of your course essay. You should read every week and we will debate about every reading signed on two specific sessions marked in the Syllabus chronogram.

Final essay: you should write a short essay about 6.000 to 8.000 words in a team of two-three co-authors (preferably). Editorial norms will be those of a standard academic journal in the economic area. The objective will be to present an academic debate offering a relevant good question related to an international economy present-day problem on growth, income distribution, monetary, trade policy, migration, etc, mainly inspired on the course topics. The first step is to find an attractive topic and a relevant question. You should make a previous

consultation with the professor to select a topic and question. That¿s should be done as early as possible in the second week of the course, with a proposal of the topic, question and three coauthors names

ASSESSMENT SYSTEM

% end-of-term-examination/test: 40

% of continuous assessment (assignments, laboratory, practicals...): 60

- You should read every week and we will debate about every reading signed on two specific sessions marked in the Syllabus chronogram.

(20% of the final mark).

- Final essay: you should write a short essay about 6.000 to 8.000 words in a team of three co-authors (preferably). Editorial norms will be those of a standard academic journal in the economy area. The objective will be to present an academic debate offering a relevant good question related with an international economy present day problem on growth, income distribution, monetary, trade policy, migration etc, inspired on the curse topics. First step is to find an attractive topic and a relevant question. You should make a previous consult with the professor to select topic and question. That¿s should be done as early as possible in the second week of the course, with a proposal of the topic, question and three coauthors name.

The essays will be discussed and presented in public the last week of the course, to receive feedback from the audience

(40% final mark (70% essay -30% presentation)).

- A Final test on the material discussed on the lectures and the papers read. (40% final mark).
