

Academic Year: (2022 / 2023)

Review date: 19/05/2022 19:00:39

Department assigned to the subject: Computer Science and Engineering Department

Coordinating teacher: MARTINEZ FERNANDEZ, PALOMA

Type: Compulsory ECTS Credits : 6.0

Year : 2 Semester : 1

OBJECTIVES

This course aim is to understand the databases roll in an Information System, to know the features which define a Databases System, and to acquire skills to implement a Databases Systems through different data models.

- Analysis and synthesis abilities
- Organize and plan abilities
- Troubleshooting
- Teamwork
- Ability to apply knowledge in practice

Cognitive (Knowledge)

- Fundamentals of Databases
- Databases development methodology
- Relational data model

Procedural/Instrumental (Know how)

- Database Design to different abstraction levels
- Implementing Database Systems using a DBMS

Attitudinal (To be)

- Ability to create designs (creativity)
- Discuss and clarify the diverse solutions for a problem

DESCRIPTION OF CONTENTS: PROGRAMME

1. Data Life cycle
2. Data modelling: describing data at different levels
3. Components of a database management system (DBMS)
4. Relational data model
5. Use of a declarative query language: SQL
6. Data governance and information management roles
7. Managing unstructure data: SQL and NoSQL databases

LEARNING ACTIVITIES AND METHODOLOGY

AF1. THEORETICAL-PRACTICAL LECTURES. These lectures will present the knowledge that students should acquire. They will receive the lecture notes and will have basic texts of reference to facilitate the follow-up of the classes and the development of the subsequent work. Exercises, practical problems on the part of the student will be solved, and workshops and evaluation tests will be carried out to acquire the required skills.

AF2. TUTORIES. Individualized assistance (individual tutorials) or group (collective tutorials) to students given by the teacher.

AF3. INDIVIDUAL OR GROUP STUDENT WORK.

MD1 THEORY LECTURE. Talks with support of computer and audiovisual media, in which the main concepts of the subject are developed and the materials and bibliography are provided to complement the students' learning process.

MD2. PRACTICES. Resolution of practical cases, problems, etc. organized by the teacher individually and/or in groups.

MD3. TUTORIES. Individualized assistance (individual tutorials) or group (collective tutorials) to students given by the teacher. For 6 credits subjects, 4 hours will be dedicated with 100% of attendance required.

ASSESSMENT SYSTEM

% end-of-term-examination/test: 50

% of continuous assessment (assignments, laboratory, practicals...): 50

SE1. FINAL EXAMINATION. This exam will globally assess the knowledge, skills and abilities acquired throughout all the term (50%)

SE2. CONTINUOUS ASSESSMENT.

Midterm exam I (10%)

Midterm exam II (10%)

Final mandatory project (30%).
