- 2.1. Introduction
- 2.2. Methods
- 2.3. Detection
- 2.4. Consequences

Session 3: Analysing Profitability

- 3.1. Introduction
- 3.2. Financial and Economic performance
- 3.3. Analysing margins

Session 4: Analysing Solvency and market performance

- 4.1. Introduction
- 4.2. Solvency ratios
- 4.3. Market ratios

Session 5: Analysing Efficiency and liquidity ratios

- 5.1. Introduction
- 5.2. Efficiency ratios
- 5.3. Liquidity ratios and Cash flow statement

- Session 6: Strategy analysis
6.1. Environment analysis
6.2. Industry analysis
6.3. Corporate strategy analysis

- Session 7: Firm Valuation
7.1. Introduction
7.2. Prospective analysis: forecasting
7.3. Valuation using multiples
7.4. Discounted cash flows model

- Session 8: Sector Analysis
8.1. Introduction
8.2. Cluster analysis
8.3. Cases

- Session 9: Bankruptcy Prediction
9.1. Introduction
9.2. Discriminant analysis
9.3. Multi-discriminant analysis
9.4. Logit Analysis

LEARNING ACTIVITIES AND METHODOLOGY

The course combines class activities (3 ECTS), team work (2ECTS) and individual work (1 ECTS). Class activities should allow the understanding and application of analysis techniques to real cases. Team work will allow students to develop and apply the acquired knowledge to a project, so that they can develop the skills outlined previously. Individual work consists in acquiring the required theoretical knowledge and implies an individual effort to know and apply the different analytical tools, and the importance of analyzing the impact of accounting choices.

ASSESSMENT SYSTEM

% end-of-term-examination/test:	50
% of continuous assessment (assignments, laboratory, practicals...):	50

Skills development will be evaluated continuously throughout the course, by means of working in class, handing out and correcting several individual assignments, (that will account 10% of final grade) and group work (accounting for 10% of the final grade). A mid term exam will contribute with 10% of final grade. In addition teams shall work on a project that consists in developing a comprehensive analysis and valuation of a company and the related report, as well as its presentation in class. This project will account for 20% of final grade (both written report and oral presentation). Finally, a written exam will add the remaining 50% (a minimum grade of 4 in this final exam will be required).
