## LEARNING ACTIVITIES AND METHODOLOGY

The course will consist of Master Classes in which the main theoretical topic of the subject will be presented, and Tutorial Classes where learning activities such as the following will be conducted:

- Comments on the course Reading and related activities.
- Group work on different theoretical aspects of the course and the presentation of the result.
- Exercises to be solved individually.

Moreover, students will be expected to conduct the following autonomous activities: to complete the reading assignments indicated in Master Classes, to participate in the preparation of the group work to be presented in Tutorial Classes, and to individually prepare the exercises prior to each tutorial session.

#### ASSESSMENT SYSTEM

<b>% end-of-term-examination/test:</b>	40
<b>% of continuous assessment (assignments, laboratory, practicals...):</b>	60
Reading based activities .....	15%
Exercises solved individually during tutorial classes or out of class.....	20%
Group work on some theoretical aspects of the course.....	25%
Final exam.....	40%

Taking part in continuous assessment means that the students attend at least 80% of practical classes and do at least 80% of classwork and homework.

In order to complete the requirements of the course, it is obligatory for the students to take the final exam and to obtain in it at least a grade of 4.
