

## Thermal engines

Academic Year: ( 2022 / 2023 )

Review date: 12-01-2022

Department assigned to the subject: Thermal and Fluids Engineering Department

Coordinating teacher: CANO PLEITE, EDUARDO

Type: Electives ECTS Credits : 6.0

Year : 4 Semester :

## OBJECTIVES

Skills:

- Thermal engine processes and relation to pollutants emissions, design parameters
- Thermal turbomachinery design

Learning results:

- Internal combustion thermal engines components, processes, trends
- Engine use, technical information management.

## DESCRIPTION OF CONTENTS: PROGRAMME

Reciprocating engines: processes and pollutants generation and control

Gas turbines: engine design

Thermal engines future trends

## ASSESSMENT SYSTEM

Partial exam: around 45% depending on teaching hours involved

Final exam: around 45% depending on teaching hours involved

Individual exercises: considered in case of limit marks

Practices: 10%

**% end-of-term-examination: 45****% of continuous assessment (assignments, laboratory, practicals...): 55**
