

Regional Geography

Academic Year: (2023 / 2024)

Review date: 24-04-2023

Department assigned to the subject: Humanities: History, Geography and Art Department

Coordinating teacher: GARCIA ALVAREZ, ANTONIO JACOBO

Type: Compulsory ECTS Credits : 6.0

Year : 2 Semester : 1

Branch of knowledge: Arts and Humanities

REQUIREMENTS (SUBJECTS THAT ARE ASSUMED TO BE KNOWN)

Geography (course 1, semester 2)

OBJECTIVES

This course aims that students acquire the knowledge and basic tools for geographical and geopolitical understanding of today's world at various scales (global, regional, local) , focusing on the analysis of some actors and regions which are particularly relevant in this respect.

DESCRIPTION OF CONTENTS: PROGRAMME

The course, structured in two parts, seek to achieve several objectives. The first of these parts aims to summarize the theoretical and conceptual foundations of regional geography, from an eminently geopolitical perspective; the main explanatory theories of the politico-territorial structure and conflicts of today's world; and the processes of regional division and differentiation at different scales, with special attention to the case of Europe. The second part will analyse some representative state and regional actors in terms of the uneven global distribution of power, namely the United States, China and Africa. The final lesson of this second part will approach the bases and territorial conflicts of the Spanish "State of Autonomies".

LIST OF TOPICS

PART I: INTRODUCTION TO REGIONAL GEOGRAPHY. A GEOPOLITICAL PERSPECTIVE

LESSON 1. Regional geography and geopolitics.

LESSON 2. Major global geopolitical theories and doctrines.

LESSON 3. Regional divisions and differentiation processes in contemporary world. The case of Europe.

PART II: THE GEOGRAPHY OF WORLD POWER AND GLOBAL ORDER (OR DISORDER)

LESSON 4. The world seen from the United States:geopolitical basis and challenges of a global superpower.

LESSON 5. The rise of Chinese superpower.

LESSON 6. Africa: a peripheral region in the world-system.

LESSON 7. Introduction to geopolitics of the Spanish "State of Autonomies".

LEARNING ACTIVITIES AND METHODOLOGY

This course combines theoretical sessions and practical sessions. Theoretical sessions present the basic contents of the subject syllabus and aim to provide students with conceptual and methodological fundamentals for understanding and analyzing the geographic reality of different regions. Theoretical sessions will be developed through classroom lectures by the teacher, while practical sessions will be focused on the reading, discussion, and critical analysis of selected bibliography, as well as, eventually, on the preparation of a written report or essay aiming to analyze a specific regional problem or area.

Tutorials will be carried out through the procedures established by the university.

ASSESSMENT SYSTEM

A) In the ORDINARY CALL, there are two possible forms of assessment, depending on whether or not continuous assessment is followed:

a.1) If continuous assessment is followed, the following criteria will be taken into account: Attendance

and active participation in class (20% of the final grade); critical summaries or alternative practical assignment (30% of the final grade); and final exam on contents (50% of the final grade). In any case, in order to pass the course, passing the final exam is a requirement (for which at least 5 out of 10 points must be obtained).

a.2) If continuous evaluation is not followed, the final exam will count 60%, so if the student receives therein a grade equal to or greater than 8.4 (out of 10), the subject will be passed.

B) In the EXTRAORDINARY CALL, the final grade will be calculated in accordance with the stipulations of point 2 of the Regulations for the continuous assessment processes in undergraduate studies, approved by the Governing Council of the University in its session of 31 May 2011. In any case, the extraordinary exam will consist of an exam related to the contents of the subject.

% end-of-term-examination:	50
% of continuous assessment (assignments, laboratory, practicals...):	50
