

Academic Year: (2023 / 2024)

Review date: 19-05-2023

Department assigned to the subject: Computer Science and Engineering Department

Coordinating teacher: ALVAREZ RODRIGUEZ, JOSE MARIA

Type: Compulsory ECTS Credits : 6.0

Year : 3 Semester : 1

REQUIREMENTS (SUBJECTS THAT ARE ASSUMED TO BE KNOWN)

Writing and Communication Skills (1st course, 1st semester)

SKILLS AND LEARNING OUTCOMES

- ¿ Know how to obtain, describe and manage requirements for the functional and non-functional description of a software application.
- ¿ Design and develop conceptual and architectural models of a software application.

DESCRIPTION OF CONTENTS: PROGRAMME

Block I. Requirements engineering
 Unit 1. Introduction to requirements engineering
 Unit 2. Elicitation, description and management of requirements
 Unit 3. Properties, attributes and organization of requirements
 Unit 4. Types of requirements

Block II. Conceptual modeling with UML
 Unit 5. Introduction to conceptual modeling
 Unit 6. Conceptual modeling: classes and objects
 Unit 7. Conceptual modeling: associations
 Unit 8. Conceptual modeling: hierarchies

Block III. Architectural modeling with UML
 Unit 9. Introduction to architectural modeling
 Unit 10. Architectural modeling: components
 Unit 11. Architectural modeling: interfaces
 Unit 12. Architectural modeling: design by contracts

LEARNING ACTIVITIES AND METHODOLOGY

Theoretical-Practical Lectures: 1 ECTS

- Review of contents before class

Practical Lectures: 1 ECTS

- Exercise resolution
- General tutoring
- Partial oral expositions of the project

Team Work: 3 ECTS

- Proposal of project statement
- Project development
- Project peer review
- Proposal of questions for the theoretical exam

Individual Work: 1 ECTS

- Contribution to team project
- Individual practical exercises
- Study and preparation of final exam

ASSESSMENT SYSTEM

CONTINUOUS EVALUATION (70%)

- Week 5, Individual theoretical mid-term exam block I: Requirements Engineering: 10%
- Week 6, 1st final project (team) delivery (and presentation): 10%
- Week 10, Individual theoretical mid-term exam block II: Conceptual Modelling: 10%
- Week 13, 2nd final project (team) delivery (and presentation) : 10%
- Week 13, Individual theoretical mid-term exam block III: Architectural Modelling: 10%
- Week 14, Delivery of two individual practical exercises: 10%
- Week 3, 4, 6, 7, 8, 9, 11, 12, 13, 1-minute quizzes: 10%

FINAL EVALUATION (30%)

- Final project, complete technical report: 20%
- Group proposal of exam-type questions: 10%

A minimum grade of 5 is required in each partial exam to pass the theoretical part. In the case of not passing one of the blocks, the student shall make a FINAL THEORETICAL EXAM ONLY including all the failed blocks.

A minimum grade of 5.0 in the final project report is required to pass the course.

% end-of-term-examination:	30
% of continuous assessment (assignments, laboratory, practicals...):	70
