

Academic Year: (2023 / 2024)

Review date: 27/04/2023 16:00:25

Department assigned to the subject: Pascual Madoz Institute of Land, Urbanism and Environment

Coordinating teacher: SERNA BILBAO, MARIA NIEVES DE LA

Type: Compulsory ECTS Credits : 3.0

Year : 1 Semester : 1

REQUIREMENTS (SUBJECTS THAT ARE ASSUMED TO BE KNOWN)

Those required by the master program

OBJECTIVES

The objectives pursued with the development of this subject are the following:

- Develop skills and abilities to choose the correct strategy for the defense of the rights of users and those affected by an incorrect use of their personal data.
- Acquire basic capacity to identify situations in which fundamental rights of citizens in this sector may be found to be particularly compromised, and in particular, adopt preventive measures to avoid the possible violation of those rights.
- Know and become basically familiar with the techniques of planning, organizing and conducting audits in the field of data protection as well as identifying what measures should be taken to improve the detected dysfunctions.
- Be able to train people in the areas of data protection and prepare guides or documents necessary for this purpose.
- Analyze, plan, evaluate and control the risks derived from not complying with the data protection regulations and propose basic solutions in this regard
- Know how to identify the provision and organization requirements that are decisive for legal advice on data protection.
- Work with ISO standards related to the subject
- Knowledge of essential documents, jurisprudence and bibliography on this matter
- Search and management of official websites related to this matter AEPD, INCIBE, ETC.

DESCRIPTION OF CONTENTS: PROGRAMME

II . Monitoring , control, audit and security measures (3 ECTS)

1. The security measures regarding data protection.
2. Monitoring and Control on Data Protection .
3. Cybersecurity
4. Casos prácticos
- 5.Evaluation

LEARNING ACTIVITIES AND METHODOLOGY

FORMATION ACTIVITIES

Theoretical-practical classes.

Search for training materials, such as jurisprudence, resolutions, etc. and comprehension and exposition works

Individual or group work of the student, presentation, defense, etc.

It is important that students participate actively in the sessions. Being a master in person, attendance at the classes will be essential to qualify the student. The attendance determined in the regulation of the Master and in GLOBAL AULA must be met to be evaluated.

TEACHING METHODOLOGIES

The methodology that will be followed in this subject will be the following:

Exhibitions in class of the different professors with support of computer and audiovisual media, in which the main concepts of the subject are developed and the bibliography is provided to complement the students' learning.

Critical reading of texts recommended by the professor of the subject: Press articles, reports, resolutions, manuals and / or academic articles, either for further discussion in class, or to expand and consolidate the knowledge of the subject

Resolution of practical cases, problems, etc. raised by the teacher individually or in groups

Exhibition and discussion in class, under the teacher's moderation, of topics related to the content of the subject, such as jurisprudence, legislation, resolutions, etc.

Preparation of papers and reports individually or in groups, with information search by the student

TUTORIALS:

Students will have access to tutorials with the person responsible for the coordination of the subject.

The purpose of tutoring is to organize the teaching and learning processes based on the interaction between the student and the teacher with the purpose of:

(i) Direct the students' autonomous and group work

(ii) Deepen in different aspects of the subject

(iii) Guide the academic and integral formation of the student.

The tutorials will be held at the time and under the conditions determined by the teacher in Aula Global.

If new extraordinary measures are adopted that require distance teaching, it will continue to be taught under the same conditions initially foreseen (with the same programming, methodology, activities, etc.), although all practical sessions will be taught online .

ASSESSMENT SYSTEM

% end-of-term-examination/test:	50
--	-----------

% of continuous assessment (assignments, laboratory, practicals...):	50
---	-----------

The mission of the evaluation is to know the degree of fulfillment of the programmed objectives. In this sense, it is necessary to indicate that the Master in Telecommunications Law, Data Protection, Audiovisual and the Information Society is a program that is taught in person, since the attendance of the student is considered essential to access and understand the knowledge and experiences transmitted by the different professors participating in the master who have an important professional and academic career in the subject developed.

From this consideration, it is necessary to highlight that the final grade of the students that seeks to value the knowledge acquired through the subject evaluation system that combines the following activities and percentages:

(i) Final Exam (50%). There will be an individual knowledge test, related to the main concepts developed during the sessions, with questions developed by the different teachers who have taught the sessions.

(ii) Carrying out individual activities or work during the course (50%): Various activities will be weighted, such as solving practical cases; search for different documentation indicated in advance and worked on; exposition and defense of the worked materials; reading of bibliography and summary of his exposition.

Students are required to attend all the theoretical and practical classes that have been scheduled. Only a maximum of 15 percent of the classroom hours (not of the sessions or days) in each subject may be absent without just cause. In case of excused absences, the total maximum will be 25 percent. If the student incurred a lack of attendance higher than those indicated, they will be scored with a "0" in the continuous evaluation. Likewise, absences below these percentages may be taken into account when modulating the continuous assessment grade downwards, especially if it includes a participation note.

Activities not carried out during the continuous evaluation will be rated with a 0. The final grade obtained may be adjusted by the teacher (up to a maximum of one point) depending on participation and class interventions.

Each teacher may require a minimum grade in the final exam in their group to carry out the global evaluation, provided that it is expressly indicated at the beginning of the term, through Aula Global or any other means.

The evaluation in the extraordinary call, if the student followed continuous evaluation, he will have the right to be taken into account the grade of the same (whenever it benefits him), and if he did not follow it, he will have the right to take a final exam with a value of 70 % of the total grade of the subject.

% end-of-term-examination/test:	50
% of continuous assessment (assignments, laboratory, practicals...):	50

Students who do not take the final exam, either in the ordinary or extraordinary call, will appear as not presented.
