Experimental Aerodynamics

Academic Year: (2023 / 2024) Review date: 28/04/2023 17:46:13

Department assigned to the subject: Aerospace Engineering Department

Coordinating teacher: DISCETTI, STEFANO
Type: Compulsory ECTS Credits: 3.0

Year: 2 Semester: 1

REQUIREMENTS (SUBJECTS THAT ARE ASSUMED TO BE KNOWN)

Students are expected to have a basic knowledge of aerodynamics and fluid mechanics.

OBJECTIVES

The main objective of the Experimental Aerodynamics course is to develop the ability to design and perform experimental campaigns and analyze experimental data. The knowledge includes the design of experiments, the facilities for aerodynamic tests, the different available measurement techniques, and the statistical tools for the analysis of the results.

DESCRIPTION OF CONTENTS: PROGRAMME

Theoretical fundamentals of experimental aerodynamics: Buckingham pi theorem, fundamental equations and non dimensional numbers.

Statistical data characterization and elements of data processing

Experimental facilities and wind tunnel testing

Aim and principles of flow visualization

Flow pressure measurements

Temperature and heat-flux measurements

Density-based methods

Thermal Anemometry

Laser Anemometry

Volumetric Velocimetry

Measurement of wall shear stresses

Force and moments measurements

LEARNING ACTIVITIES AND METHODOLOGY

AF1 - Theoretical session

AF2 - Practical session

AF3 - Computer room practical session

AF4 - Laboratory sessions

AF5 - Individual student work

AF6 - Tutorials

AF7 - Partial and final exams

MD1 - Class lectures by the professor with the support of computer and audiovisual media, in which the main concepts of the subject are developed and the bibliography is provided to complement the student's learning.

MD3 - Resolution of practical cases, problems, etc. posed by the teacher individually or in groups.

MD5 - Preparation of reports individually or in groups.

ASSESSMENT SYSTEM

% end-of-term-examination/test: 25 % of continuous assessment (assignments, laboratory, practicals...): 75

- 1) to have a MINIMUM mark of 4.0/10 in the end-of-term exam;
- 2) to have a minimum overall mark of 5.0/10 (weighting 25% the end-of-term exam mark and 75% the mark of the continuous evaluation).

Note that in the extraordinary call it is possible to pass the course either by completing the previous points or by obtaining a MINIMUM grade of 5.0/10 (valuing the final exam 100%)
