

Globalization

Academic Year: (2023 / 2024)

Review date: 29-04-2022

Department assigned to the subject: Humanities: History, Geography and Art Department, Social Sciences Department

Coordinating teacher: GARMENDIA MADARIAGA, AMUITZ

Type: Electives ECTS Credits : 6.0

Year : Semester :

DESCRIPTION OF CONTENTS: PROGRAMME

The historical part of the subject studies the phenomenon of globalization from the network society. Two contemporary technical revolutions have transformed the dimensions of space and time for human beings: the transport revolution, begun in the nineteenth century, and the digital revolution, which, begun in the twentieth century, already shows its effects at all levels of human activity in this twenty-first century. To study what this phenomenon consists of and the scenario of transformations that it presents is the objective of this part.

The Network as a space without places, without distances and without delays: the technological foundation of a networked world.

The continuous connection: people and connected objects.

From the industrial ship to 3D printing: a new concept of production and distribution of goods.

Big Data: new hegemonies.

Citizens of the world in network and digital identity: the chain of blocks.

Imbalances, conflicts and opportunities.

The sociological module of the course Globalization examines the main debates that organize the sociological literature on the topic, as well as the main topics on which this literature focuses.

Theoretical Debate: Convergence versus Diversity Globalization and Economic Inequality

Globalization and Geographical Mobility

Globalization and Values

Globalization and Supranational Identifications

Globalization and Xenophobia

Globalization and the Formation of Transnational Social Groups

% end-of-term-examination: 60

% of continuous assessment (assignments, laboratory, practicals...): 40
