

Academic Year: (2023 / 2024)

Review date: 27-04-2023

Department assigned to the subject: Private Law Department

Coordinating teacher: GARCIA MANDALONIZ, MARTA

Type: Electives ECTS Credits : 6.0

Year : 4 Semester :

REQUIREMENTS (SUBJECTS THAT ARE ASSUMED TO BE KNOWN)

Students do not need to have completed a specific subject for optimal learning.

OBJECTIVES

This subject provides students with specific and basic practical knowledge of the public and private financing instruments available to our companies.

Special emphasis will be placed, firstly, on the analysis of the financial resources available to small and medium-sized enterprises (SMEs), as these small companies are the basis of the country's economic and productive fabric. Likewise, in the financing of technology-based companies, the driving force behind innovation and technology transfer. Finally, in the financing of social enterprises or enterprises with socially responsible economic projects.

This knowledge will be useful and of interest for the academic and professional projection of the student specialising in finance.

To achieve this objective, the student must acquire a series of knowledge, skills and attitudes.

In terms of knowledge, at the end of the course the student will be able to:

- Understand and synthesise the functioning of the various instruments, public and private, available to the entrepreneur to finance his activity.

In terms of skills, at the end of the course the student will be able to: Understand and summarise the functioning of the various instruments, public and private, available to the entrepreneur to finance his activity:

- Draw up reports on the different business financing instruments.
- Analyse and discern the financial resources that best suit the legal and economic structure of the company.

In terms of attitudes, after completing the course the student should have:

- A critical, flexible and responsible attitude with respect to the functioning of the company's own and external financing channels.
- An entrepreneurial, innovative and social spirit.

With all of the above, the learning outcomes will be the following:

1. To be introduced to the general legal framework that regulates the Financial Markets (Credit Market and Stock Market).
2. To understand and know how to synthesise the functioning of the different public and private instruments available to the entrepreneur to finance his economic activity.
3. Acquire a specific knowledge of the legislation applicable to the instruments of own and external financing of companies.
4. Identify the financial instruments specifically regulated for small and medium-sized companies.
5. To be able to identify the most appropriate financial instruments for technology-based companies.
6. Know the regulations for the promotion of the financing of social enterprises.

LEARNING ACTIVITIES AND METHODOLOGY

The aim is to train students in the subjects covered by the programme through a system of active and participative learning.

Successful completion of the course will involve the acquisition of theoretical and practical knowledge. This theoretical-practical duality will allow students to obtain an optimal knowledge of the business financing system.

Practical knowledge will be obtained through the study of the actual documentation and forms used in business financing. In this sense, it will be useful to read and prepare practical cases, comments, reports or business plans.

The hours of study and work done by students outside class will be taken into account when calculating the ECTS credits of the subject.

ASSESSMENT SYSTEM

THE ASSESSMENT OF THE ACQUISITION OF COMPETENCES WILL BE BASED ON:

- Theoretical-practical knowledge of the subject content.
- Acquisition of skills and abilities.

Continuous assessment of the student will be based on the following criteria:

- Class attendance and participation (10%)
- Practical work (50%)
- Oral presentation (10%)
- Partial group exam with the possibility of consulting documentation ("open book" mode) (15%).
- Final theoretical-practical research work (25%).

As a whole, the purpose of continuous assessment is to check whether students have fulfilled the learning objectives.

Through assessment, students must demonstrate that they possess and understand the knowledge of the discipline, that they are able to make judgements, that they are able to communicate this knowledge and that they have acquired learning skills.

In short, the aim is to achieve knowledge, skills or professional skills and the ability to work in practice in a team in the legal field of corporate finance.

% end-of-term-examination:	0
% of continuous assessment (assignments, laboratory, practicals...):	100
