

Academic Year: (2023 / 2024)

Review date: 28-04-2023

Department assigned to the subject: International Law, Ecclesiastical Law and Philosophy of Law Department

Coordinating teacher: ABAD CASTELOS, MONTSERRAT

Type: Compulsory ECTS Credits : 6.0

Year : 2 Semester : 1

OBJECTIVES

Students must know and understand the basic elements of public international law. To this end, the syllabus logic is distributed across topics (general questions, subjects, sources, application, use of force, global public goods, etc.), through which they can study the fundamentals of the subject. Throughout this syllabus, special attention is paid to the historical and dynamic characteristics of the international legal order, taking into account the specificities of the legal system of Spain. The principal aim of this syllabus is to avoid a formalistic approach towards international law, given that an excessively rigid view would be negative in order to acquire the necessary skills needed by the students in order to fully understand the international legal phenomenon and all its complexities.

DESCRIPTION OF CONTENTS: PROGRAMME

Lesson 1. International society and International law. 1. International law as a historical phenomenon. 2. The transition from classical International law to the contemporary one. 3. Basic features of the International Environmental Law (IEL). 3. Main dimensions of the IEL, in particular the global scale issues: (i) Atmospheric pollution and Ozone Depletion. (ii) Climate change. (iii) Biodiversity. (iv) Desertification. (v) Other issues. 4. The Agenda 2030.

LEARNING ACTIVITIES AND METHODOLOGY

The purpose of the teaching methodology is to follow the Bologna model and its continuous evaluation system. Thus, the theoretical knowledge acquired is refined and put into practice in the practical classes, searching for deepening the indispensable interconnection between theory and practice. For that, lecturers for theory and practice should always be linked and coordinated in order to convey the best possible overview.

The teaching activities will combine different teaching methods (in particular, the seminar classes might include workshops, debates, oral presentations, short essays, cinema-forum, etc.). Some activities will follow a timeline foreseen. In spite of this schedule, the lecturer in charge might make changes deemed as appropriate.

ASSESSMENT SYSTEM

% end-of-term-examination:	50
% of continuous assessment (assignments, laboratory, practicals...):	50

The continuous assessment will be organized by the lecturer in charge of the seminar classes. Following the Bologna model, this continuous evaluation will have a great weight in the calculation of the final grade.

Also, there will be a compulsory exam at the end of the term. This exam will be focused on the theoretical content of the subject. It will consist of four questions: students will dismiss one and answer the remaining three questions. The length of the exam will be one hour.

In any case, the minimum mark required to pass the final exam will be 4 points (4/10). Therefore, the student who does not obtain these four points will not be able to pass the subject

In order to achieve the greatest possible correspondence between the assimilation of the theoretical contents taught and the practical implementation, the evaluation of the knowledge acquired through the final exam may be carried out by both the lecturers who are responsible for giving the master sessions and by those who are in charge of the practical classes.

In this extraordinary call, the minimum grade required to pass the final exam will continue to be 4 points (4/10). But the student will be able to obtain the 100% of the final grade through this final exam (therefore, without taking into account any eventual score derived from the continuous assessment, if this is the most favorable option for him/her).
