## LEARNING ACTIVITIES AND METHODOLOGY

Lectures given by the teacher and activities done by students who will test the knowledge acquired and develop their skills.

The training activities aim to involve students in the learning process. To this end, the teacher will provide basic knowledge and tools needed to strengthen their analytical ability and encourage their critical spirit. In this regard, the reading of selected materials and essays written by students will be fundamental. Likewise, the professor will encourage discussions on current topics, presentations and role play so that students expand their communication and interpersonal skills. This will be complemented by screenings of documentaries / films relating to any matter relevant to the subject. This latter is intended to capture students' interest on issues that sometimes may seem too abstract, without a clear empirical referent.

6 ECTS credits, 150 hours approximately. Lectures and other activities in class: 42 hours Study of the subject by the student: 50 hours Preparation of presentations and essays by students: 48 hours Make-up classes, office hours, hand-in of papers, etc.: 8 hours Exam: 2 hours
