LEARNING ACTIVITIES AND METHODOLOGY

The contents are organized through theory lessons (where the teacher will present the basic concepts of the course) and practical lessons (in which students must apply the knowledge previously acquired in other practical cases). Attending sessions is important to develop the subjects. As well, during practical sessions discussions may be proposed: active participation in these debates will be a evaluation criterion. Attendance to lectures, tutorials and other activities requires previous out-of-class reading of the learning materials.

ASSESSMENT SYSTEM

% end-of-term-examination:	40
% of continuous assessment (assignments, laboratory, practicals...):	60

In both the regular and special exams:

Final exam: 40%
Participation in classes: 20%
Practical cases and papers submitted: 40%

In order to pass the course, it will be necessary to obtain a mark of 5/10 or higher in the final exam.
