**OBJECTIVES****Basic Competences**

Possess and understand knowledge that provides a basis or opportunity to be original in the development and/or application of ideas, often in a research context.

Students know how to apply their acquired knowledge and problem-solving skills in new or unfamiliar settings within broader (or multidisciplinary) contexts related to their field of study.

Students are able to integrate knowledge and face the complexity of making judgments based on incomplete or limited information that includes reflections on the social and ethical responsibilities linked to the application of their knowledge and judgments.

Students know how to communicate their conclusions and the knowledge and the reasons behind them to both specialised and non-specialised audiences in a clear and unambiguous way.

Students possess the learning skills that will enable them to continue studying in a way that will be largely self-directed or autonomous.

**General Competencies**

Understand the main analytical tools from political science, sociology or economic history.

Evaluate and compare different contributions to important social science debates from an analytical, methodological and empirical point of view.

To plan and carry out an autonomous research programme in some field of the social sciences.

Evaluate the internal logic of a scientific publication, examining the consistency between theory, analytical strategy, indicators, results and conclusions.

Understand and know how to synthesize the main theories into one or more contemporary debates in the social sciences.

**Specific Competences**

To apply the acquired knowledge to the evaluation, formulation and critique of economic policies within the framework of different types of capitalism.

To identify the economic and social bases of the functioning of political regimes.
