LEARNING ACTIVITIES AND METHODOLOGY

TRAINING ACTIVITIES

Individual work for the study of theoretical and practical materials prepared and provided by the lecturer.
Theoretical-practical face-to-face classes.
Tutorials
Case studies
Group work

TEACHING METHODOLOGIES

- Lectures by the lecturer with the support of computer and audiovisual media, in which the main concepts of the subject are developed and the bibliography is provided to complement the students' learning.
- Critical reading of texts recommended by the subject teacher: press articles, reports, manuals and/or

academic articles, either for subsequent discussion in class or to expand and consolidate knowledge of the subject.

- Solving case studies, problems, etc. posed by the teacher individually or in groups.
- Presentation and discussion in class, under the moderation of the teacher, of topics related to the content of the subject, as well as practical cases.
- Preparation of individual or group work and reports.
- Reading of theoretical and practical teaching materials prepared and provided by the lecturer in class or on the virtual educational platform.

Use of Artificial Intelligence tools selectively allowed in this subject. The faculty may indicate a list of works and exercises that the student can perform using AI tools, specifying how they should be used, and how the student should describe the use made of them. If the use of AI by the student gives rise to academic fraud by falsifying the results of an exam or work required to accredit academic performance, the provisions of the Regulation of the University Carlos III of Madrid of partial development of the Law 3/2022, of February 24th, of University Coexistence will be applied.

Tutorial regime:

Weekly tutorials, by appointment with the lecturer.

ASSESSMENT SYSTEM

% end-of-term-examination:	40
% of continuous assessment (assignments, laboratory, practicals...):	60

Continuous assessment (60%): participation at class, cases and research work.

En-of-term examination (40%)

Cases (3/10)

Exam (4/10)

Work (3/10)

This evaluation system will be valid both in the 1^a and in the 2^a convocatoria.

Extraordinary call:

Students who do not pass the course in the ordinary call will have an extraordinary call to pass the course:

1. If the student followed the continuous evaluation: the grade will be the one established for the ordinary call. However, the student will have the right to be graded only with the grade obtained in the final exam if it is more favorable.
2. If the student did not follow the continuous evaluation: the grade will be the grade obtained in the final e
