

Academic Year: (2024 / 2025)

Review date: 09-04-2024

Department assigned to the subject: Computer Science and Engineering Department

Coordinating teacher: ABDULLA JASSIM, HARITH AL JUMAILY

Type: Basic Core ECTS Credits : 6.0

Year : 1 Semester : 2

Branch of knowledge: Engineering and Architecture

REQUIREMENTS (SUBJECTS THAT ARE ASSUMED TO BE KNOWN)

- Programming (Course: 1 / Semester: 1)
- Calculus (Course: 1 / Semester: 1)

DESCRIPTION OF CONTENTS: PROGRAMME

1. Abstract Data Type
2. Linear Abstract Data Types: stacks, queues, linked lists.
3. Complexity of Algorithms.
4. Recursive Algorithms.
5. Trees
6. Graphs.
7. Divide and Conquer.

LEARNING ACTIVITIES AND METHODOLOGY

THEORETICAL-PRACTICAL CLASSES. [44 hours with 100% classroom instruction, 1.67 ECTS]
Knowledge and concepts students must acquire. Student receive course notes and will have basic reference texts to facilitate following the classes and carrying out follow up work. Students partake in exercises to resolve practical problems and participate in workshops and evaluation tests, all geared towards acquiring the necessary capabilities.

TUTORING SESSIONS. [4 hours of tutoring with 100% on-site attendance, 0.15 ECTS]
Individualized attendance (individual tutoring) or in-group (group tutoring) for students with a teacher.

STUDENT INDIVIDUAL WORK OR GROUP WORK [98 hours with 0 % on-site, 3.72 ECTS]

WORKSHOPS AND LABORATORY SESSIONS [8 hours with 100% on site, 0.3 ECTS]

FINAL EXAM. [4 hours with 100% on site, 0.15 ECTS]
Global assessment of knowledge, skills and capacities acquired throughout the course.

METHODOLOGIES

THEORY CLASS. Classroom presentations by the teacher with IT and audiovisual support in which the subject's main concepts are developed, while providing material and bibliography to complement student learning.

PRACTICAL CLASS. Resolution of practical cases and problem, posed by the

teacher, and carried out individually or in a group.

TUTORING SESSIONS. Individualized attendance (individual tutoring sessions) or in-group (group tutoring sessions) for students with a teacher as tutor.

LABORATORY PRACTICAL SESSIONS. Applied/experimental learning/teaching in workshops and laboratories under the tutor's supervision.

ASSESSMENT SYSTEM

% end-of-term-examination:	50
% of continuous assessment (assignments, laboratory, practicals...):	50

EVALUATION SYSTEMS

SE1 - FINAL EXAM. [50 %]

Global assessment of knowledge, skills and capacities acquired throughout the course.

SE2 - CONTINUOUS EVALUATION. [50 %]

Assesses papers, projects, class presentations, debates, exercises, internships and workshops throughout the course.

The evaluation includes the following tests:

- First Theoretical-practical exam of continuous assessment (topics 1, 2 y 3) (SE2): 25%.
- Second Theoretical-practical exam of continuous assessment (topics 3, 4 y 5) (SE2): 25%.
- Final Exam (all the topics) (SE1): 50%. The maximum mark is 5 points. Minimum mark: 2 over 5.

The final mark for the course is obtained by summing all marks of the evaluation continuous system. To pass the course, it is necessary to obtain at least 50 points (over 100).

If a student decides not to follow the continuous assessment (that is, he/she renounces the marks obtained in the continuous evaluation), he/she will be entitled to take a final exam (same date and place as the ordinary exam). The grade obtained in this exam is equivalent to 60% of the final grade (that is, it is necessary to get 8.3 over 10 to pass the subject).
