

Academic Year: (2024 / 2025)

Review date: 26-04-2024

Department assigned to the subject: Social Sciences Department

Coordinating teacher: MARTINELLI LASHERAS, PABLO

Type: Basic Core ECTS Credits : 6.0

Year : 2 Semester : 1

Branch of knowledge: Social Sciences and Law

REQUIREMENTS (SUBJECTS THAT ARE ASSUMED TO BE KNOWN)

There are no specific requirements for this course.
A basic knowledge of introductory economics is nonetheless desirable.

OBJECTIVES

Course contents:

- . A first approximation to the evolution of living standards over the last 2,000 years.
- . The causes and consequences of industrialization in the West.
- . The determinants of catch-up and convergence or their absence in various parts of the world in different time periods.
- . The evolution of the international economy from the early modern period to the present.
- . The role of institutions in the process of development.

Skills and competences:

- . Development of individual learning routines via the analysis of relevant texts in economic history and the collection and analysis of historical evidence.
- . Development of group-based learning routines via group-based discussion and the oral and written presentation of work by teams.
- . Development of verbal and written communication skills.
- . Develop the ability to raise questions and answer them using economic analysis.

DESCRIPTION OF CONTENTS: PROGRAMME

1. Modern economic growth.
2. Population and natural resources.
3. Markets and institutions.
4. Technological change and economic growth..
5. The modern firm.
6. Globalization.
7. The modern state and economic growth.

LEARNING ACTIVITIES AND METHODOLOGY

Students will acquire the knowledge and skills through lectures, the handing of the work assigned by the teachers and its discussion in class. Skills and attitudes will be enhanced by the individual and teamwork performed by the students and their discussion in class. The tutorials moreover will also try to open up the discussion to the students via the collective analysis of tables, graphs or texts and the use of questions and multiple choice tests on the main concepts discussed in the lecture.

The course will keep the following schedule: Students will have access to the following material: at the beginning of the course, a reading list will be assigned to each topic. Students will have access to all the graphic material used in class: graphs, tables, maps, power point slides. The tasks to be performed by the students will be handed out in the class tutorials. The students according to the calendar and relevant deadlines provided by each professor will hand in these tasks. The lectures present the

concepts, theories and models that can be applied to each topic and develop the main historical narrative of the course. The activities developed during the tutorials are designed to stimulate the students to use the analytical concepts developed in the course to understand past situations and develop a deeper comprehension of current economic problems.

There will be at least one tutorial in the last weeks of the course in which the student will have the chance to clarify doubts about the main concepts and models used in the lectures, as well as doubts about assessment and the schedule of the course.

ASSESSMENT SYSTEM

% end-of-term-examination:	60
% of continuous assessment (assignments, laboratory, practicals...):	40

The final exam will represent a maximum 60 per cent of the final mark. To pass the course a minimum mark of 5 out of 10 or less in the final exam (both in the first and in the second call) might be established. If that were the case, the main course lecturer will make that minimum grade explicit in the course syllabus. There will be continuous controls throughout the course to make students read and prepare the class materials. Marks from these controls and class exercises will count an important percentage of the final mark. Both the exams and the controls serve the purpose of evaluating the degree of knowledge acquired by the student, his or her ability to transfer this knowledge into a similar context and adapting these ideas to new situations. Eligibility for continuous assessment might require attendance to a minimum number of sessions.

Students not eligible for the continuous assessment will take an exam covering also the topics and course materials specific to the continuous evaluation.
