LEARNING ACTIVITIES AND METHODOLOGY

The learning methodology involves theoretical lessons, practical lessons, the discussion of documents (legislation, case law and academic papers) and debates

The course will be carried out following a bimodal system (50%) during the academic year 2020/2021: the aggregated group will follow an online synchronous system while the reduced group will follow a presential system.

ASSESSMENT SYSTEM

% end-of-term-examination:	60
% of continuous assessment (assignments, laboratory, practicals...):	40

The presential system will be the result of the application of the following systems of evaluation:

- Participation in the resolution of practical cases during the development of the classes (20 %)
- Two modular exams developed along the course, which date will be announced in advance (80 %)

The weight of presential system will be 40%.

The final examination (60%) will consist of a test of practical character of the fact that the pupil will be able to have the regulation.
