PART I. INTRODUCTION

1. The current business environment
 - 1.1. Globalization
 - 1.2. Digitalization
 - 1.3. Diversity
 - 1.4. Sustainability
2. Corporate social responsibility
 - 2.1. Towards shareholders
 - 2.2. Towards clients
 - 2.3. Towards employees
 - 2.4. Towards lenders
 - 2.5. Environmental responsibility

Readings:

Madura (2010), Chapter 2.

PART II. FIRM STRATEGY

3. General strategy
 - 3.1. Industry analysis
 - 3.2. Internal analysis: resources and capabilities
 - 3.3. Business strategies

3.4. Corporate strategies

Readings:

Dess and Lumpkin (2003), Chapters 3, 5 and 6.
Mateos (2006), Chapters 5 and 6.

4. Marketing strategy

4.1. Identifying the target market

4.2. Positioning

4.3. Consumer behavior

Readings:

Maynar, Bañegil and Galera (2007), Chapter 9.

5. Production strategies

5.1. Production concepts

- Break-even point and operational leverage
- Productivity and costs
- Economies of scale
- Costs and benefits of inventories
- Flexibility

5.2. Production strategies

- Mass production
- Flexible production
- Just in time production

Readings:

Maynar, Bañegil and Galera (2007), Chapter 7.

PART III. FINANCIAL MANAGEMENT

6. Financial analysis

6.1. Accounting information: financial information in the balance sheet and income statement.

6.2. Economic and financial analysis of the firm

- Accounting ratios
- Economic and financial return.
- Leverage: operational, financial and total.
- Working capital
- Production to invoice lead time

Readings:

Madura (2010), Chapter 15.

Maynar, Bañegil and Galera (2007), Chapter 5.

7. Investment decisions

7.1. Characterizing an investment project

7.2. Payback

7.3. The time value of money

7.4. Net present value and internal rate of return

Readings:

Maynar, Bañegil and Galera (2007), Chapter 6.

Madura (2010), Chapter 17.

8. Financing

8.1. Debt financing

8.2. Equity financing

8.3. Capital structure

Readings:

Maynar, Bañegil and Galera (2007), Chapter 6.

Madura (2010), Chapter 16.

PART IV. ORGANIZATION AND HUMAN RESOURCE MANAGEMENT

9. Organizational structure

9.1. Elements of structure

- Chain of command
- Scope of control
- Line and staff

9.2. Horizontal and vertical coordination

9.3. Departmentation criteria

9.4. Types of structures

- Functional
- Multidivisional
- Matrix
- Horizontal
- Modular

Readings:

Madura (2010), Chapter 8.

Mateos (2006), Chapter 9.

Daft, Murphy and Willmott (2017), Chapter 4.

10. Human resource management

10.1. Internal labor markets

10.2. High performance work practices

10.3. Externalization

10.4. The role of the legal framework

PART V. PRODUCTION MANAGEMENT

11. Production decisions

11.1. Location

11.2. Capacity

11.3. Plant layout

Readings:

Maynar, Bañegil and Galera (2007), Chapter 7.

12. Production control

12.1. Productivity control

12.2. Quality control

12.3. Inventory control

Readings:

Maynar, Bañegil and Galera (2007), Chapter 8.

PART VI. MARKETING DECISIONS

13. Product and price

13.1. Product attributes

13.2. Price setting

Readings:

Madura (2010), Chapter 12.

Maynar, Bañegil and Galera (2007), Chapter 10.

14. Product distribution and promotion

14.1. Distribution

- Distribution channels: direct, one level, several levels
- Market coverage: intensive, selective and exclusive distribution
- Characteristics of retailers
- Services of wholesalers

14.2. Promotion

- Advertising

- Personal sale
- Sales promotion
- Social networks

Readings:

Madura (2010), Chapters 13 and 14.

Maynar, Bañegil and Galera (2007), Chapter 10.

LEARNING ACTIVITIES AND METHODOLOGY

Every week there will be a theory session (in a large group) and a practical session (in a small group). Students must study the contents of each theory session after the session takes place. Exercises and cases must be solved before the corresponding practical sessions. Practical sessions will be devoted to discuss and provide solutions to the exercises that students will have previously worked at. There will also be weekly office hours which will be scheduled by each professor at the beginning of the term.

ASSESSMENT SYSTEM

% end-of-term-examination: 50

% of continuous assessment (assignments, laboratory, practicals...): 50

The final grade will be the weighted sum of two partial exams (each counting 20%), weekly assignments (10%) and a final exam (worth 50%).

The compulsory materials for all exams include not only the contents of the lectures and practical sessions, but also the chapters of the reference books that are indicated for each topic. Moreover, students will be expected to have a knowledge of the economic, political and social context in accordance with their status of university students, based on the press or other information media.

An absence in any of the partial exams will imply a grade equal to zero in that exam except in case of a medical cause. In that case, the student will have to provide a medical certificate stating that on the day of the exam his health made it impossible to take an exam in normal conditions.

The final grade will be the weighted average across all different grading components. The course is passed if the overall grade equals at least a 5.0 or is above.

If the percentage of students with an overall grade of Sobresaliente is less than 10 percent of the students who have taken the final exam in the Degree, the following corrections will be applied:

a) the top students with a Notable grade will be given a grade of 9 until the 10-percent level is approximately reached.

b) After the previous correction is made, if the number of students with a Notable grade is below 10 percent, an analogous correction will be made, raising the grades of the top students with an Aprobado grade to 7, until a 10-percent level is approximately reached.

c) After the previous correction is made, if the number of students with an Aprobado grade is below 15 percent, the grades of the students with the highest Fail grades will be raised to 5 until the 15-percent level is approximately reached.

These percentages will in any case be considered approximate.
