LEARNING ACTIVITIES AND METHODOLOGY

The case method is used, consisting of the constant resolution of problems, of cases, facing the study of the matter. For this purpose, the student is provided with some materials at the beginning of the course that contain said cases so that the student can solve them before each session and in this session the solutions are discussed.

In this subject, the use of artificial intelligence tools to carry out the work or exercises proposed by the lecturer is discouraged unless explicitly authorised. In the event that the use of AI by the student gives rise to academic fraud by falsifying the results of an exam or work required to accredit academic performance, the provisions of the Carlos III University of Madrid Regulations for the partial development of Law 3/2022, of 24 February, on university coexistence will be applied.

ASSESSMENT SYSTEM

% end-of-term-examination:	60
% of continuous assessment (assignments, laboratory, practicals...):	40

ORDINARY CONVOCATION

CONTINUOUS ASSESSMENT

This system will be applicable to those students who regularly attend 90% of the sessions, for which random attendance controls will be carried out.

The total grade scores about 10, according to the following breakdown:

- 4 points - continuous assessment: It will consist of one or more partial tests, in the terms that will be announced at the beginning of the term
- 6 points - final exam. To pass this course, it is necessary to achieve a minimum score of 2.1 out of 6 in the final exam. Thus, the student will fail the course if this requirement is not met, even though he may reach at least a score of 5 points as a result of the addition of the continuous assessment and the final exam's grades.

Student participation in class will positively influence the student's final grade.

NON-CONTINUOUS ASSESSMENT

For those students who choose not to attend class or who, while attending, do not pass the continuous assessment tests.

The final grade is based on the final examination, on which the student can score a maximum of 6 points out of 10. A rule of three shall apply on the qualification obtained in the examination: if a student obtains 10 points in this final exam, he will achieve a 6 points grade for this course. This means that a student may obtain 8.3 points out of 10 in the final exam to pass the course.

EXTRAORDINARY CONVOCATION

The mark of the continuous assessment process is kept if the student has followed it. If the student did not follow it, he/she is entitled to an exam with a value of 100% of the total grade of the subject.
