LEARNING ACTIVITIES AND METHODOLOGY

The master classes will be taught in large groups and practical sessions in small groups. Lectures will allow the acquisition of skills necessary to understand the subject and to continue the practical classes. The teaching methodology of practical classes is based on case study, problems of interpretation of rules, tutorials for global use, participation in discussion forums, partial discharge of checks and regular tutorials throughout the course. There will be two group tutoring sessions, to be set along the course. Attached is the course schedule detailing the teaching methodology will be applied.

ASSESSMENT SYSTEM

Continuous assessment and final exam.

There will be partial controls (50%): the profesor will evaluate the continuous work of the student and the student will have to doing the exams about several subjets

There wil be a final exam (50%): the profesor will evaluate the student`s capacity of comprehension and his capacity for solving the practical cases
