COURSE: SECURE ARCHITECTURES		
MASTER: CYBERSECURITY	**YEAR: 2017-18**	**TERM: 2nd**

WEEKLY PLANNING

WEEK	SESSION	DESCRIPTION	GROUPS (mark X)		Special room for session (computer classroom, audio-visual classroom…)	WEEKLY PROGRAMMING FOR STUDENT		
			LECTURES	SEMINARS/ LAB[1]		DESCRIPTION	CLASS HOURS	HOMEWORK HOURS (Max. 7h week)
1	1	Presentation of the course Introduction to Secure Architecture	X			Study about Security Design Principles for secure architectures	1,66	5
1	2	Architecting Secure Cloud Computing	X			Analyse a case study on Cloud Computing Security, giving details on: security implications of going cloud, top threats, defence mechanisms and current tools/methodologies for cloud security assessment and certification	1,66	
2	3	Authorization	X			Review and study traditional access control models, such as DAC, MAC, RBAC, and current AC as ABAC. Discuss about advantages and disadvantages of each one.	1,66	5
2	4	Languages and infrastructures for authorization	X			Study deployed languages and infrastructures (e.g., XACML and SAML) for access control in Web and Cloud Computing.	1,66	

3	5	Lab I: Authorization & Identity Management (IdM)		X	Lab	Deploy and tests of a SAML-based authorization infrastructure. Experiment with different profiles	1,66	7
3	6	Lab I (cont.): Authorization & Identity Management (IdM)		X	Lab	Deploy and tests of a SAML-based authorization infrastructure. Experiment with different profiles. Document and submit a report with answers to questions posed.	1,66	
4	7	Multilevel and Multilateral Security	X			Learn about classified Information, security models (e.g., Bel-LaPadula, Biba,etc.). Understand examples and practical considerations.	1,66	7
4	8	Attack Tolerance		X	Lab	Study and identify DDoS Protection mechanisms. Deploy a simple DoS attack as a proof-of-concept. Review back-up and restoration strategies and systems.	1,66	
5	9	Lab II: Enhancing the deployed Authorization & IdM infrastructure		X	Lab	Mandatory assignment. The goal is to enhance the deployed infrastructure in Lab I to add more functionalities.	1,66	7
5	10	Lab II (cont): Enhancing the deployed Authorization & IdM infrastructure		X	Lab	Mandatory assignment (cont)	1,66	
6	11	Physical Security	X			Study security against emanations. TEMPEST.	1,66	7
6	12	Students work presentation		X	Lab	Technical oral presentation and defence of the practical work done in Lab II. Document and submit the report.	1,66	
						Subtotal 1	**19,92**	**38**
						Total 1 *(Hours of class plus student homework hours between weeks 1-7)*		**57,92**

[1] **A maximum of 1-2 lab sessions**

1-7		Tutorials, handing in, etc					10	
8		Assessment					3	7
						Subtotal 2	**3**	**17**
						Total 2 *(Hours of class plus student homework hours at week 8)*		**20**

TOTAL *(Total 1 + Total 2)*	**77,92**
