

|        | SUBJECT: Analogue Electronics 1                                |         |  |                     |          |             |  |   |            |   |
|--------|--|---------|--|---------------------|----------|-------------|--|---|------------|---|
|        | GRADO: Grado en Ingeniería Electrónica Industrial y Automática |         |  |                     |          | COURSE: 3º  |  | TERM: 1 2013/2014   |            |   |
|        | PLANIFICACIÓN SEMANAL DE LA ASIGNATURA                         |         |  |                     |          |             |  |   |            |   |
| DATE   | WEEK   | SESSION | SESSION DESCRIPTION  | GROUP<br>(marcar X) |          |             |  | STUDENT HOMEWORK  |            |   |
|        |  |         |  | THEORY              | PRACTICE | DESCRIPTION |  | CLASS HOURS   | HOME HOURS |   |
| 11-sep | 1  | 1       | Section 0. Introduction.<br>Section 1.1. Reviewing diodes.<br>Section 1.2.1 to 1.2.3. Reviewing n-channel MosFet. Completing to the rest of the FETs.<br>Section 1.3. Reviewing BJT Transistors .  | X                   |          |             |  | Reviewing the 2º course subject "Fundamentos de Ingeniería Electrónica", particularly Diodes and n-channel MosFets, its applications (rectifiers and voltage limiters) and biasing circuits | 2,5        | 7 |
| 12-sep | 1  | 2       | Reviewing Session 1 through solving exam level problems:<br>• Section 1.4.1.: Diodes applications.<br>• Section 1.2.4.: Biasing circuits   |                     | X        |             |  | Solving similar exam level examples   | 1,66       |   |
| 18-sep | 2  | 3       | Section 2.1 Reviewing the Small Signal Concept.<br>Section 2.2. Small Signal Models of Diodes, BJTs and FETs<br>Section 2.3.1. Reviewing the amplification concept.<br>Section 2.3.2. Reviewing the coupling capacitors. Linear Systems and Superposition Theorem. | X                   |          |             |  | Studying Section.   | 2,5        | 7 |

|        |   |    |   |   |   |  |  |   |      |  |   |
|--------|---|----|---|---|---|--|--|---|------|--|---|
|        |   |    |   |   |   |  |  |   |      |  |   |
| 19-sep | 2 | 4  | Section 1.4.2. DC analysis with BJTs and Mosfets examples<br>Section 1.4.3. Current Sources examples.   |   | X |  |  | Solving similar exam level examples   | 1,66 |  |   |
| 25-sep | 3 | 5  | <b>Lab Session 1: The Transistor and the Diode. DC Analysis.</b>  |   | X |  |  | Lab material.   | 1,66 |  | 7 |
| 26-sep | 3 | 6  | Section 2.3.3. Analysis of a Common-Drain amplifier.<br>Section 2.3.3.1. Analysis of a Common-Emitter amplifier, CE with emitter capacitor, and common-collector and amplifier. | X |   |  |  | Reviewing Session 3 and analysis of the rest of the configurations, both for BJTs and FETs. | 1,66 |  | 7 |
| 02-oct | 4 | 7  | Reviewing Section 2 through the solving of exam level problems.   |   | X |  |  | Solving similar exam level examples   | 1,66 |  | 7 |
| 03-oct | 4 | 8  | Section 2.3.4 Static and dynamic lines. Dynamic range.<br>Section 2.3.5. Multistage amplifiers.   | X |   |  |  | Studying Section  | 1,66 |  |   |
| 09-oct | 5 | 9  | <b>Lab Session 2: Electronic Amplifiers: Small Signal.</b>  |   | X |  |  | Lab material.   | 1,66 |  | 7 |
| 10-oct | 5 | 10 | (Sections 1 and 2)<br><b>Exam 1:</b> Solving an exam level problem of DC and small signal analysis.<br>Section 3.1. Basic concepts of frequency response. Examples.             | X |   |  |  | Solving similar exam level examples   | 1,66 |  |   |
| 16-oct | 6 | 11 | Application exercises of Section 3.1.: transfer functions of RC circuits and Bode Diagrams.   |   | X |  |  | Solving similar exam level examples   | 1,66 |  | 7 |

|        |    |    |  |   |   |  |  |  |   |      |   |
|--------|----|----|--|---|---|--|--|--|---|------|---|
|        |    |    |  |   |   |  |  |  |   |      |   |
| 17-oct | 6  | 12 | Section 3.2.2. Time constants method and its application to CE and CC configurations.  | X |   |  |  |  | Application of the Time constants method to CB configuration.                               | 1,66 |   |
| 23-oct | 7  | 13 | (Section 3.2.2.) Exam level problems of CE and CC configurations frequency response.   |   | X |  |  |  | Solving similar exam level examples   | 1,66 | 7 |
| 24-oct | 7  | 14 | Section 3.2.3. Time constants method and its application to CS and CD configurations   | X |   |  |  |  | Time constants method and its application to CG configuration                               | 1,66 |   |
| 30-oct | 8  | 15 | <b>Lab Session 3: Electronic Amplifiers: Frequency Response.</b>   |   | X |  |  |  | Lab material.   | 1,66 | 7 |
| 31-oct | 8  | 16 | (Section 3)<br><b>Exam 2: Solving an exam level problem of Frequency Response.</b><br>Section 4.1. Basic concepts of feedback systems. Examples. | X |   |  |  |  | Solving similar exam level examples   | 2,5  |   |
| 06-nov | 9  | 17 | (Section 4.1.)<br>Obtaining the Equivalent Quadrupole. Solving simple feedback circuits.   |   | X |  |  |  | Solving similar exam level examples.  | 1,66 | 7 |
| 07-nov | 9  | 18 | Section 4.2. y 4.3. Ideal Series-Parallel feedback amplifier.<br>Expanding to a real case with load effects.                                     | X |   |  |  |  | Analysis of ideal feedback amplifiers Series-Series, parallel-parallel and parallel-series. | 1,66 |   |
| 13-nov | 10 | 19 | (Section 4.2.)<br>Exercises of Series-Parallel feedback amplifiers.  |   | X |  |  |  | Solving similar exam level examples   | 1,66 | 7 |

|        |    |    |  |   |   |  |  |   |      |   |
|--------|----|----|--|---|---|--|--|---|------|---|
| 14-nov | 10 | 20 | Section 4.3. Analysis of a real series-series and parallel-parallel feedback amplifier.  | X |   |  |  | Analysis of a real parallel-series feedback amplifier.  | 1,66 |   |
| 20-nov | 11 | 21 | (Section 4.3.)<br>Exercises of feedback amplifiers of the rest of the topologies.  |   | X |  |  | Solving similar exam level examples   | 1,66 |   |
| 21-nov | 11 | 22 | (Section 4)<br><b>Exam 3: Solving an exam level problem of feedback amplifiers.</b><br><br>Section 5.1. Reviewing of Operational Amplifiers and its basic configurations.                    | X |   |  |  | Studying Section and reviewing the 2º course subject "Fundamentos de Ingeniería Electrónica", particularly the OA concepts and problems in both open circuit and feedback configurations. | 1,66 | 7 |
| 27-nov | 12 | 23 | <b>PRÁCTICA 4: Feedback electronic Amplifiers.</b>   |   | X |  |  | Lab material  | 1,66 |   |
| 28-nov | 12 | 24 | Section 5.2. Integrating and Derivative configurations based on AO. Examples.<br>Section 5.3. Differential Amplifiers.<br>Section 5.4. OA as a multistage Amplifier. Analysis of the AO-741. | X |   |  |  | Studying Section  | 2,5  | 7 |
| 04-dic | 13 | 25 | Exercises of DA and OA.  |   | X |  |  | Studying Section y solving examples   | 1,66 |   |
| 05-dic | 13 | 26 | Section 6.1 Stabilized Sources.<br>Section 6.2 Regulated Sources.  | X |   |  |  | Studying Section  | 1,66 | 7 |
| 11-dic | 14 | 27 | (Sections 5 and 6)<br>Mixed Examples of both Sections  |   | X |  |  | Solving similar exam level examples   | 1,66 | 7 |

|        |    |    |   |  |  |  |  |                   |           |
|--------|----|----|---|--|--|--|--|-------------------|-----------|
|        | 14 | 28 | (Sections 5 and 6)<br>Exam 4: Differential amplifiers. Operational Amplifiers. Sources                        |  |  |  |  |                   | 0,83      |
|        |    |    |   |  |  |  |  | <b>Subtotal 1</b> |           |
|        |    |    |   |  |  |  |  | <b>49,16</b>      | <b>98</b> |
