

## COURSE:

POSTGRADE: UNIVERSITY MASTER OF MACHINES AND TRANSPORTS	ECTS: 6	TERM: 1
Teacher: MARCOS RODRIGUEZ MILLAN		

WEEKLY PLANNING								
WEEK	SESION	DESCRIPTIION	GROUP		Special room for session (computer classroom, audio- visual classroom)	WEEKLY PROGRAMMING FOR STUDENT		
			1	2		DESCRIPTION	CLASS HOURS	HOMEWORK HOURS Max 7 H per week
1	1	Introduction to machining process	x				1h30	
1	2	Interest of high speed cutting process: advantages and limitations Proposal of research projects.	X			Review notes and knowledge seen in the previous class	1h30	1h
2	3	Introduction of modelling of process. Show the different models are in the literature (analytical, numerical and phenomenological) Advantages and limitations of them.	X			Review notes and knowledge seen in the previous class	1h30	1h
2	4	Calculate of cutting force (orthogonal and oblique cutting process) and the length of contact.	x			Review notes and knowledge seen in the previous class	1h30	1h
3	5	Description of Mechant model. Hypothesis of model / critics/ improvements.	x			Review notes and knowledge seen in the previous class	1h30	1h

3	6	Importance of good description of material behavior of materials in order to use the cuting models (analytical and numerical). Obtain the strain and strain rate in the shear primary region	X	Computer classroom	Review notes and knowledge seen in the previous class	1h30	1h
4	7	Flow stress. Description of the different flow stress (for metals) of the literature. Determination of material parameters of Johnson- Cook model and types of tests in order to obtain them.	X	Computer classroom	Review notes and knowledge seen in the previous class	1h30	1h
4	8	Effect of material behavior in machining. Differences between metals and composites.	x	Computer classroom	Review notes and knowledge seen in the previous class	1h30	1h
5	9	Importance of the temperature in machining process: obtaining of damage (mechanical and thermica) due to cutting process.	x	Computer classroom	Review notes and knowledge seen in the previous class	1h30	1h
5	10	Description of Molinari model. Hypothesis of model (I)	x		Review notes and knowledge seen in the previous class	1h30	1h
6	11	Description of Molinari model. Hypothesis of model (II)	x		Review notes and knowledge seen in the previous class	1h30	1h
6	12	Non-conventional machining process (Electroerosion, ultrasounds,) (I)	x		Review notes and knowledge seen in the previous class	1h30	1h
7	13	Non-conventional machining process (Electroerosion, ultrasounds,) (II)	x		Review notes and knowledge seen in the previous class	1h30	1h

7	14	Non-conventional machining process (Electroerosion, ultrasounds,) (III)	X	Review notes and knowledge seen in the previous class	1h30	1h
8	15	Non-conventional machining process (Electroerosion, ultrasounds,) (IV)	X	Review notes and knowledge seen in the previous class	1h30	1h
8	16	Cutting tool for machining. Features (I)	X	Review notes and knowledge seen in the previous class	1h30	1h
9	17	Cutting tool for machining. Features (II)	X	Review notes and knowledge seen in the previous class	1h30	1h
9	18	Manufacturing in Motorsport industry (I)	X	Review notes and knowledge seen in the previous class	1h30	1h
10	19	Manufacturing in Motorsport industry (II)	X	Review notes and knowledge seen in the previous class	1h30	1h
10	20	Manufacturing in Motorsport industry (III)	X	Review notes and knowledge seen in the previous class	1h30	1h
11	21	Manufacturing in Motorsport industry (IV)	X	Review notes and knowledge seen in the previous class	1h30	1h

				seen in the previous class		
14	20		^	and knowledge	11120	111
14	28	Students expositions	X	previous class Review notes	1h30	1h
14	21			and knowledge seen in the	1130	111
14	27	Plenary Lecture (Airbus)	x	seen in the previous class Review notes	1h30	1h
13	26	Plenary Lecture (Eurocopter)	X	Review notes and knowledge	1h30	1h
		transmissions,) (IV)		and knowledge seen in the previous class		
13	25	Manufacturing in mechanical industry (6 engines,	x	previous class Review notes	1h30	1h
12	24	Manufacturing in mechanical industry (6 engines, transmissions,) (III)	×	and knowledge seen in the	1130	IU
12		transmissions,) (II)	x	and knowledge seen in the previous class Review notes	1h30	1h
12	23	Manufacturing in mechanical industry (6 engines,	x	seen in the previous class Review notes	1h30	1h
11	22	Manufacturing in mechanical industry (6 engines, transmissions,) (I)	X	Review notes and knowledge	1h30	1h
