

### **EVALUATION MATRIX OF MASTER'S THESIS**

The Master's thesis is evaluated by a panel of two other scholars in the Oral Thesis Defense. Examiners are asked to evaluate the thesis according to a number of criteria as indicated in the grid in the thesis examination form which is presented next. The four central learning goals are:

### - General Knowledge

- Knowledge of marketing disciplines: graduates will demonstrate their overall competency in all the functional areas of marketing
- Knowledge of instrumental disciplines: Graduates will be able to show competency in complementary disciplines providing useful instruments for marketers.

#### - Interpersonal skills

- Oral communication skills: Graduates will be able to express themselves clearly defending their ideas in the business world.
- o Written communication skills: Graduates will be able to write and argument their ideas effectively in the business environment.

#### Conceptual analysis

- Collect and analyze relevant information: Graduates will be capable of finding, processing and also summarize information.
- Use of knowledge for solving practical problems. Graduates will be capable of analyzing information critically, integrating it with their knowledge in order to solve practical problems and to formulate appropriate decisions.

## Universidad Carlos III de Madrid Master in Marketing

The following FMT Evaluation Matrix will be used for evaluating the FMT, in response to four learning objectives of the program:

<u>SKILLS</u>	0 - 2,9	3-4.9	5-6.9	7-8.9	9-10
Knowledge of marketing disciplines	The student fails to know the marketing discipline.	The student makes some sever error that requires them to reformulate their work.	The student shows a basic level of knowledge on marketing discipline, but makes small errors.	The student has a sound knowledge of the marketing discipline, but makes a few small errors.	The student shows a perfect knowledge of the marketing discipline.
Knowledge of instrumental disciplines	It is unable to answer the questions of the examiners' panel.	It has difficulties answering some questions of the examiners' panel	It is able to answer the questions of the examiners panel with hesitation and small errors.	It is capable of answering the questions of the committee, providing additional arguments.	The student uses the examiners' questions to delve into the analysis of some features of his/her thesis, as experts in the area would do.

Measurement of the learning objectives "Interpersonal skills" will be done with a 1-10 point grading system in the FMT, in order to quantify the extent to which students have mastered verbal communication skills as well as the level of self-confidence that is necessary to make effective business presentations.

Measurement of the learning objective "Conceptual analysis" will be done with a 1-10 point grading system in the FMT.

analyze relevant information  t c c c c c c c c c c c c c c c c c c	The description of the topic was done with data and opinions taken from irrelevant references and are not validated. Evidence is ignored, inconsistently or inappropriately presented. There is evidence of plagiarism.  The problem attempted to be described is wrong because it is not well defined or is not justified that it is not already solved.  The thesis presents serious or frequent problems of accuracy when using reference material. It fails to recognize obvious counter-arguments. Arguments are often presented as if they were evidence.	The description of the topic includes some data, conclusions and opinions from relevant sources, but data is mixed up with references that are not validated. Little care is shown in the use of tertiary sources.  The problem is described but is not sufficiently justified that it is not already solved or is not analyzed from all perspectives.  The thesis analyzes the data, but the analysis is not too rigorous, hiding obvious counterarguments or disguising unlikely assumptions as facts.	The description of the topic includes some data, conclusions and opinions from relevant sources.  It is justified that the problem is not solved or is not analyzed from all perspectives.  The thesis analyzes the data rigorously. It does not try to hide obvious counterarguments or disguise unlikely assumptions as facts.	The description of the topic includes relevant data, conclusions and opinions from reliable sources, but does not include the current status of the project boundary. The use of tertiary sources is generally avoided.  The relevance of the problem to be addressed is well justified by using the information gathered.  The thesis analyzes data rigorously. It does not try to hide any counterarguments or unlikely assumptions disguised as facts.	The description of the topic includes relevant data, conclusions and opinions from reliable sources and tertiary sources that relate to the main theme of the project and the state of affairs.  The relevance of the problem to be addressed is perfectly justified with the gathered information.  The data analysis is exhaustive and correct. The thesis recognizes and confronts any possible counterarguments. It distinguishes the demonstrable arguments and unlikely but necessary assumptions
